000-013: Applying Fundamentals of Enterprise Solutions Using IBM

Practice Exam: 000-013 Exams

Exam Number/Code: 000-013

Exam Name: Applying Fundamentals of Enterprise Solutions Using IBM

Questions and Answers: 97 Q&As

([IBM certifications I](#))

Exam : [000-013](#)

IBM certifications I [000-013](#) Braindumps Q&A are created by senior IT lecturers in Just4Exam certification Q&A network and IBM certifications I product experts combination PROMETRIC or VUE true-to-date environmental examination of the original title.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **IBM IBM certifications I 000-013** examination of original title complete coverage. Just4Exam **000-013 Braindumps** Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: 000-013

Exam Name: Applying Fundamentals of Enterprise Solutions Using IBM(IBM certifications I)

Questions and Answers: 97 Q&A

Just4Exam provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 000-013 Exam.

000-013 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the IBM certifications I product experts, included the current newest 000-013 examination questions.

3. 100% Guarantee to Pass Your IBM certifications I exam and get your IBM certifications I Certification.

All will purchase "000-013 Q&A" customers will obtain refund money after-sale commitments if do not pass the exam, And enjoy the upgrade Q&A service for free in one year. Ensure customers a pass rate. Just4Exam helps you one time pass the IBM certifications I 000-013 tests.

We promised that use Just4Exam Q&A ensure you pass the exam at your first try.

1. The Q&A are from cooperation exam center of the real original title, summarized by our professional team and collated by senior IT lectured in co-training center to make sure the professional quality of the Q&A. The correctly of the Q&A is 100%, the coverage of 000-013 Q&A are more than 96%. All you need to study the whole 000-013 Q&A before you participate the certification exam, it should be possible to easily complete the exam and pass the certification.

2. Just4Exam to all the Q&A, we promised "do not pass the exam give you a full refund". If you buy our 000-013 Q&A and did not pass the exam at the first try. You can take the examination report card that stamped with PROMETRIC or VUE test centers Seal. we will refund your full cost of 000-013 Q&A, absolutely guarantee you interests have no losses. (For a full refund details)

3. Just4Exam professional IT Q&A vendors, we provide well after-sale service. To all the customers buy the Q&A, we provide track service. when you buy the Q&A with in one year. you can enjoy the upgrade Q&A service for free. If in this period, the certified test center change the 000-013 Q&A, we will update the Q&A in the first time, and provide you the download update for free.

[IBM 000-013](#) Test belongs to one of the IBM certifications I certified test, if needs to obtain the IBM certifications I certificate, you also need to participate in other related test, the details you may visit the [IBM certifications I](#) certified topic, in there, you will see all related IBM certifications I certified subject of examination.

000-013

Just4Exam professional provide IBM certifications I 000-013 the newest Q&A, completely covers 000-013 test original topic. With our complete IBM certifications I resources, you will minimize your IBM certifications I cost and be ready to pass your 000-013 tests on Your First Try, 100% Money Back Guarantee included!

Just4Exam Engine Features

Comprehensive questions and answers about 000-013 exam

000-013 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

000-013 exam questions updated on regular basis

Same type as the certification exams, 000-013 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 000-013 exam demo before you decide to buy it in Just4Exam.com

Just4Exam Help You Pass Any IT Exam

[Just4Exam.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-013

Title : Applying Fundamentals of Enterprise Solutions Using IBM

1. Which programming languages need to be available to manage an unsupported operating system with an IBM Tivoli Identity Manager adapter?

A.Java and C

B.Cobol and REXX

C.C++ and Javascript

D.Visual Basic and C#

Answer: A

2. Which specification has completed the OASIS standardization process as of July, 2008?

A.WS-Policy

B.WS-Security

C.WS-Federation

D.WS-SecureConversation

Answer: B

3. The following information is important when creating a diagram of a customers organization:

- divisions

- location(s) / geographical information

- reporting chains

What additional information is important to have when creating this diagram?

A.business units

B.email addresses

C.Help Desk functions

D.whether or not the customer has a dedicated operations center

Answer: A

4. What is the purpose of the context diagram for a security solution?

A.It provides a detailed listing of the software used in the solution and how the software is connected.

B.It provides a detailed listing of the hardware used in the solution and how the hardware is connected.

C.It scopes the security system's responsibilities and provides a black box view of the system interface.

D.It provides a listing of the hardware and software used in the system and how they are interconnected.

Answer: C

5. A current IBM Tivoli security customer is very satisfied with their current IBM Tivoli Identity Manager (ITIM) and IBM Tivoli Access Manager (ITAM) implementations. The customer has benefited greatly from the user management and provisioning, authentication, authorization and Web single sign-on processes now in place.

The customer sees the value of Web services and wants to leverage their business partnerships to greatly expand their online services, for a relatively small investment. They are expecting that their existing ITIM and ITAM investments can simply be stretched to include these business-to-business (B2B) flows.

IBM Tivoli Federated Identity Manager should be added to this scenario to address which security requirement?

A.the blocking of threats that might otherwise cross enterprise boundaries

B.the handling of potentially millions of users, which neither ITIM nor ITAM was built to address

C.the integration with firewalls that control security between any two businesses involved in these B2B flows

D.the handling of multiple types of standards-based protocols and user tokens that need to be passed between participating businesses

Answer: D

6. In security solution design development, when do you document the business and IT organizational structure map?

A.when establishing the customer's baseline for planning purposes

B.when identifying opportunities for business partner security offerings

C.when evaluating the customer's IT processes, people and technologies

D.when defining a long-term vision for the future direction of the customer's security solutions

Answer: A

7. Business Rules catalogs are effective in gathering requirements for what items?

A.user registry layout

B.password strength policies

C.user interaction with the system

D.administrator interaction with the system

Answer: B

8. A customer has resources being managed in different facilities.

When configuring a security solution, what is the most important element to consider in the design of the system?

A.use of a fiber optic backbone

B.the encryption protocol to be used

C.location of firewalls in the internal network

D.the time zone in which each facility is located

Answer: C

9. Which two business goals are accomplished through the implementation of a successful automated security

management process? (Choose two.)

- A.increase data availability
- B.increase data duplication
- C.reduce impact of threats
- D.eliminate any risk of frauds
- E.reduce Total Cost of Ownership (TCO) for account management

Answer: CE

10. What information is needed when creating a document concerning a customer's IT and business organizational structure? (Choose two.)

- A.number of business units
- B.annual expenditure on IT assets
- C.number of employees in IT organization
- D.list of divisions within the IT department
- E.total number of systems used by the company

Answer: AD

11. Which network client software collects policy data from collectors and summarizes this data to provide its version information and the number of policy violations that form the posture credentials to the CISCO Trust Agent client software?

- A.CISCO Access Control Server
- B.CISCO Trust Agent running on the network client system
- C.Remediation Manager client running on the network client system
- D.Tivoli Security Compliance Manager client running on the network client system

Answer: D

12. In order to correctly understand the data protection requirements, which two groups of people must be interviewed? (Choose two.)

- A.all managers
- B.IT department personnel
- C.Business Unit management
- D.Legal department personnel
- E.Human Resource department

Answer: CD

13. Which tasks need to be accomplished during an initial meeting with the customer when reviewing a company organizational chart?

- A.identify key decision makers and document the key players and their roles
- B.identify key decision makers and provide a detailed analysis of the current customer configuration
- C.determine which products are to be used and document the key players and their roles
- D.determine which products are to be used and identify key decision makers

Answer: A

14. What is the objective of documenting the business and IT organizational structure of a company?

- A.It helps the solution advisor identify the number of products that need to be deployed.
- B.This step is essential to identify key areas of the business processes that relate to security.
- C.It indicates the approximate number of licenses required for each product the company purchases.
- D.The business organizational structure must match certain specifications for the product to be usable.

Answer: B

15. Which document describes what needs to be addressed in a security solution for a customer?

- A.Installation History
- B.Design Specification

C.Interface Specification
D.Requirements Specification

Answer: D

16. Who must approve a requirements specification?

- A.the customer and the sales team
- B.the customer and the implementation team
- C.the implementation team and the sales team
- D.the implementation team and the product support team

Answer: B

17. Which tasks need to be accomplished during an initial meeting with the customer when reviewing a company organizational chart?

- A.determine the products to be used and provide Proof of Concept of the products in the solution
- B.document the key players and their roles and provide Proof of Concept of the products in the solution
- C.identify key decision makers and determine the products to be used
- D.identify key decision makers and document the key players and their roles

Answer: D

18. What is the most common impediment to designing an automated security solution?

- A.an unreliable connection to remote systems
- B.too many firewalls between managed systems
- C.an application interface that is unavailable on managed systems
- D.nonstandard encryption protocols used for secure communications

Answer: C

19. What needs to be defined for the Identity Management aspect of a Security Solution?

- A.processes
- B.driver's licenses
- C.password selection
- D.employee pay bands

Answer: A

20. You meet with the customer and compile the following list concerning security:

- customers business requirements
- immediate business/security needs
- customers long-term business/security vision
- customers stated security requirements

What should also be included in this list?

- A.list of products to be deployed
- B.government security standards
- C.existing change control processes
- D.companys complete organizational chart

Answer: B
