Given the statements below:

- Rootdbs is too small.
- Applications are waiting on locks.
- Deadlocks abound.

- Disk space ran out.

What are the likely problems that caused the crash?

- A. Logical Logs and physical log and temp space found therein, along with all of the database indexes and tables. Tables have table locks.
- B. Logical Logs and physical logs and temp space found therein, along with all of the database indexes and tables. Tables have page locks.
- C. Logical Logs and physical log and temp space found therein, along with all of the database indexes and tables. Tables have page locks.
