CheckPoint Check Point Certified Managed Security Expert Plus VSX NGX

156-816: Check Point Certified Managed Security Expert Plus VSX NGX

Practice Exam: 156-816 Exams

Exam Number/Code: 156-816

Exam Name: Check Point Certified Managed Security Expert Plus VSX NGX

Questions and Answers: 140 Q&As

([CheckPoint](#))

Exam : [156-816](#)

CheckPoint [156-816](#) Braindumps Q&A are created by senior IT lecturers in Just4Exam certification Q&A network and CheckPoint product experts combination PROMETRIC or VUE true-to-date environmental examination of the original title.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **CheckPoint CheckPoint 156-816** examination of original title complete coverage.Just4Exam **156-816 Braindumps** Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 156-816

Exam Name: Check Point Certified Managed Security Expert Plus VSX NGX(CheckPoint)

Questions and Answers: 140 Q&A

Just4Exam provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 156-816 Exam.

156-816 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the CheckPoint product experts, included the current newest 156-816 examination questions.

3. 100% Guarantee to Pass Your CheckPoint exam and get your CheckPoint Certification.

All will purchase "156-816 Q&A" customers will obtain refund money after-sale commitments if do not pass the exam, And enjoy the upgrade Q&A service for free in one year. Ensure customers a pass rate.Just4Exam helps you one time pass the CheckPoint 156-816 tests.

We promised that use Just4Exam Q&A ensure you pass the exam at your first try.

1. The Q&A are from cooperation exam center of the real original title,summaried by our professional team and collated by senior IT lectured in co-training center to make sure the professional quality of the Q&A.The correctly of the Q&A is 100%, the coverage of 156-816 Q&A are more than 96%.All you need to study the whole 156-816 Q&A before you participate the certification exam,it should be possible to easily complete the exam and pass the certification.

2. Just4Exam to all the Q&A, we promised "do not pass the exam give you a full refund". If you buy our 156-816 Q&A and did not pass the exam at the first try. You can take the examination report card that stamped with PROMETRIC or VUE test centers Seal. we will refund your full cost of 156-816 Q&A, absolutely guarantee you interests have no losses.(For a full refund details)

3. Just4Exam professional IT Q&A vendors, we provide well after-sale service. To all the customers buy the Q&A, we provide track service. when you buy the Q&A with in one year. you can enjoy the upgrade Q&A service for free. If in this period, the certified test center change the 156-816 Q&A, we will update the Q&A in the first time, and provide you the download update for free.

[CheckPoint 156-816](#) Test belongs to one of the CheckPoint certified test, if needs to obtain the CheckPoint certificate, you also need to participate in other related test, the details you may visit the [CheckPoint](#) certified topic, in there, you will see all related CheckPoint certified subject of examination.

156-816

Just4Exam professional provide CheckPoint 156-816 the newest Q&A, completely covers 156-816 test original topic. With our complete CheckPoint resources, you will minimize your CheckPoint cost and be ready to pass your 156-816 tests on Your First Try, 100% Money Back Guarantee included!

Just4Exam Engine Features

Comprehensive questions and answers about 156-816 exam

156-816 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

156-816 exam questions updated on regular basis

Same type as the certification exams, 156-816 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 156-816 exam demo before you decide to buy it in Just4Exam.com

Just4Exam Help You Pass Any IT Exam

[Just4Exam.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Check Point 156-816

Title : Check Point Certified Managed Security Expert Plus VSX NGX

1. What is the difference between Single-Context and Multi-Context processes?

- A. Single-Context processes are implemented in standard firewall deployments, while only Multi-Context processes are implemented in VSX Gateway deployments.
- B. Single-Context processes are shared between VSX Gateways in an HA configuration, while Multi-Context processes are shared between VSX Gateways in a Load Sharing environment.
- C. Single-Context processes are ones in which all Virtual Systems share, while Multi-Context processes are unique to each Virtual System.
- D. Single-Context processes are implemented in a single VSX Gateway environment, while Multi-Context processes are only implemented in VSX Gateway High Availability (HA).
- E. Single-Context processes are unique to each Virtual System on a Gateway, while Multi-Context processes are ones in which all Virtual Systems share.

Answer: E

2. Which of the following is NOT a type of physical interface seen in a VSX Gateway?

- A. Warp
- B. Internal
- C. Dedicated management

- D. External
- E. Synchronization

Answer: A

3. A Warp Link is a virtual point-to-point connection between a:

- A. Virtual Router and Virtual System.
- B. Virtual Router and Virtual Switch.
- C. Virtual System and the management interface.
- D. Virtual Router and a physical interface.
- E. Virtual System and another Virtual System.

Answer: A

4. When deploying a VSX Gateway managed by a Provider-1 MDS, how many Administrators can connect in Read/Write mode to the MDS database simultaneously?

- A. One for each CMA
- B. No more than 250
- C. One
- D. No more than 25
- E. Two; one can connect to the Management Virtual System database, while the other connects to the Virtual System database.

Answer: A

5. When configuring Virtual Systems with overlapping IP addressing, the Virtual Systems must:

- A. Be included in a VPN.
- B. Be on the same network.
- C. Perform Network Address Translation.
- D. Perform in Bridge mode.
- E. Define VLAN Tags.

Answer: C

6. Which of the following items is most commonly configured as the default Gateway for a Management Virtual System?

- A. Interface leading to the management network
- B. Same setting as the default Gateway of the External Virtual Router; typically this is a perimeter router.
- C. External Virtual Router
- D. Internal Virtual Router
- E. Interface leading to the synchronization network

Answer: C

7. In a VSX Gateway cluster, which of the following objects are available by default as installation targets for the Management Virtual System?

- A. Individual Management Virtual Systems (MVS) for each cluster member
- B. MVS cluster object
- C. Individual External Virtual Routers for each cluster member
- D. Virtual Switch cluster object
- E. Individual Virtual Switch Members

Answer: B

8. TRUE or FALSE. A Virtual System in Bridge mode can enforce anti-spoofing definitions.

- A. True, anti-spoofing must be manually defined in bridge mode.
- B. True, as long as the Virtual System has more than two interfaces defined.
- C. True, as long as Network Address Translation is performed.
- D. True, anti-spoofing measures are defined automatically in Bridge mode.

E. False, anti-spoofing cannot be configured for Virtual Systems in Bridge mode.

Answer: A

9. What are the two levels of VSX Gateway clustering?

- A. INSPECT and database level
- B. Database and VSX Gateway levels
- C. Virtual device and database levels
- D. INSPECT and configuration levels
- E. Virtual device and VSX Gateway levels

Answer: E

10. If you want your customer's Virtual Systems to give protected hosts access to and from the Internet, which of the following must be configured as a public IP address?

- A. Default Gateway IP address of the Virtual Switch
- B. Main IP of the customer's Virtual System
- C. Main IP of the Virtual Switch
- D. Default Gateway IP address of the Management Virtual System
- E. Main IP of the Management Virtual System

Answer: B

11. A _____ is a virtual security device configured on a VSX Gateway, which operates as a complete routing and security domain, with firewall and VPN capabilities.

- A. Virtual Switch
- B. Context Identification Module
- C. Virtual System Extension
- D. Virtual System
- E. External Virtual Router

Answer: D

12. How many Management Virtual System instances does each member of a VSX Gateway cluster run?

- A. One for each physical interface on the Gateway
- B. One for each cluster member
- C. Only one
- D. Two, the cluster MVS and the unique Gateway MVS
- E. One for each Virtual System configured on the Gateway

Answer: C

13. Which of the following can function as a Management Server for a VSX Gateway?

- A. Check Point Integrity
- B. SiteManager-1 NGX Multi-Domain Server
- C. Security Management Portal
- D. VPN-1/FireWall-1 Small Office
- E. Provider-1 NGX Multi-Domain Server

Answer: E

14. Which of the following statements is true concerning the default Security Policy of the External Virtual Router?

- A. The External Virtual Router automatically performs Hide NAT behind its external interface for all Virtual Systems connected to it.
- B. The default Policy of the External Virtual Router denies all traffic going to or coming from it.
- C. The default policy of the External Virtual Router cannot be changed.
- D. All traffic coming from networks protected by a VSX Gateway is accepted. All other traffic is dropped.
- E. The External Virtual Router always enforces the same Policy as the Management Virtual System.

Answer: B

15. When configuring a Provider-1 management solution for your VSX Gateway, what is the fewest number of CMAs that must be licensed, for VSX management functionality?

- A. 50
- B. 25
- C. 5
- D. 10
- E. 1

Answer: D

16. When deploying a VSX Gateway managed by a SmartCenter Server, which of the following statements is TRUE?

- A. VSX Administrators can configure different domains for each Virtual System.
- B. Multiple Administrators can simultaneously connect to the same database, to manage multiple Customers.
- C. All Customer objects, rules, and users are shared in a single database.
- D. Each Virtual System has its own unique Certificate Authority.
- E. VSX superuser Administrators can configure granular permissions for each Customer Administrator.

Answer: C

17. You are configuring source-based routing in a VSX Gateway deployment with both External and Internal Virtual Routers. Which of the following functions cannot be configured for the Virtual Systems?

- A. Virtual System clustering
- B. Anti-spoofing measures
- C. Network Address Translation
- D. Remote access VPNs
- E. Intranet VPNs

Answer: B

18. During the initial configuration of a VSX Gateway cluster, the VSX Administrator is prompted to specify each cluster member's name, as shown below: Which of the following best describes this name?

- A. IP address of the individual VSX Gateway in the cluster
- B. Any name the VSX Administrator chooses to describe the cluster member
- C. Customer for which this VSX Gateway cluster is configured
- D. MAC address of the individual VSX Gateway in the cluster
- E. Hostname of the individual VSX Gateway in the cluster

Answer: B

19. During MDS installation, you must configure at least one VSX Administrator. After creating the Administrator, you are prompted to perform which task?

- A. Grant VSX-specific privileges to the Administrator
- B. Assign the Administrator to manage a specific Virtual System
- C. Add the Administrator to a group
- D. Assign the Administrator to manage a specific interface on the VSX Gateway
- E. Assign the Administrator to manage a specific CMA

Answer: C

20. Which of the following MDS types allows you to create and manage a VSX Gateway?

- A. MDS CLM
- B. MDS Manager station
- C. MDS VSX Integrator
- D. MDS MLM
- E. MDS Manager + Container station

Answer: E
