Symantec Administration of HA Solutions for UNIX (VCS 5.0)

250-251: Administration of HA Solutions for UNIX (VCS 5.0)

Practice Exam: 250-251 Exams

Exam Number/Code: 250-251

Exam Name: Administration of HA Solutions for UNIX (VCS 5.0)

Questions and Answers: 120 Q&As

([Symantec Certified Security program](#))

Symantec Certified Security program [250-251](#) Braindumps Q&A are created by senior IT lecturers in Just4Exam certification Q&A network and Symantec Certified Security program product experts combination PROMETRIC or VUE true-to-date environmental examination of the original title.

Exam : [250-251](#)

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Symantec Symantec Certified Security program 250-251** examination of original title complete coverage. Just4Exam **250-251 Braindumps** Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: 250-251

Exam Name: Administration of HA Solutions for UNIX (VCS 5.0)(Symantec Certified Security program)

Questions and Answers: 120 Q&A

Just4Exam provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 250-251 Exam.

250-251 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Symantec Certified Security program product experts, included the current newest 250-251 examination questions.

3. 100% Guarantee to Pass Your Symantec Certified Security program exam and get your Symantec Certified Security program Certification.

All will purchase "250-251 Q&A" customers will obtain refund money after-sale commitments if do not pass the exam, And enjoy the upgrade Q&A service for free in one year. Ensure customers a pass rate. Just4Exam helps you one time pass the Symantec Certified Security program 250-251 tests.

We promised that use Just4Exam Q&A ensure you pass the exam at your first try.

1. The Q&A are from cooperation exam center of the real original title, summarized by our professional team and collated by senior IT lectured in co-training center to make sure the professional quality of the Q&A. The correctly of the Q&A is 100%, the coverage of 250-251 Q&A are more than 96%. All you need to study the whole 250-251 Q&A before you participate the certification exam, it should be possible to easily complete the exam and pass the certification.

2. Just4Exam to all the Q&A, we promised "do not pass the exam give you a full refund". If you buy our 250-251 Q&A

and did not pass the exam at the first try. You can take the examination report card that stamped with PROMETRIC or VUE test centers Seal. we will refund your full cost of 250-251 Q&A, absolutely guarantee you interests have no losses.(For a full refund details)

3. Just4Exam professional IT Q&A vendors, we provide well after-sale service. To all the customers buy the Q&A, we provide track service. when you buy the Q&A with in one year. you can enjoy the upgrade Q&A service for free. If in this period, the certified test center change the 250-251 Q&A, we will update the Q&A in the first time, and provide you the download update for free.

[Symantec 250-251](#) Test belongs to one of the Symantec Certified Security program certified test, if needs to obtain the Symantec Certified Security program certificate, you also need to participate in other related test, the details you may visit the [Symantec Certified Security program](#) certified topic, in there, you will see all related Symantec Certified Security program certified subject of examination.

250-251

Just4Exam professional provide Symantec Certified Security program 250-251 the newest Q&A, completely covers 250-251 test original topic. With our complete Symantec Certified Security program resources, you will minimize your Symantec Certified Security program cost and be ready to pass your 250-251 tests on Your First Try, 100% Money Back Guarantee included!

Exam : Symantec 250-251

Title : Administration of HA Solutions for UNIX (VCS 5.0)

1. Which resource type attributes can be set in order to tune VCS failover characteristics? (Choose two.)

- A. AutoStart
- B. ConfInterval
- C. ConfTimeout
- D. MonitorInterval
- E. OfflineMonitorInterval

Answer: BD

2. Which types of monitoring can be performed on Oracle resources? (Choose two.)

- A. detail monitoring
- B. basic level monitoring
- C. kernel level monitoring

- D. specific monitoring
- E. service monitoring

Answer: AB

3. You are installing a VCS upgrade that does not require a system reboot, but does require a VCS restart. Which method maximizes user access to the clustered applications during the upgrade?

- A. use the VCS rolling upgrade option which restarts VCS transparently
- B. stop VCS using the orce option and then restart VCS on each system
- C. evacuate service groups while upgrading one system at a time
- D. stop VCS using the all option and then restart VCS on each system

Answer: B

4. When preparing to install VCS on the S1 and S2 systems, what should you do to verify software compatibility? (Choose three.)

- A. check the VCS release notes for supported software
- B. run the `installvcs recheck S1 S2` command
- C. let the `installvcs` script check compatibility at install
- D. run the `installvcs ompat S1 S2` command
- E. check the Symantec Enterprise Support website

Answer: ABE

5. Which resource type attributes can be set in order to tune VCS failover characteristics? (Choose two.)

- A. Flags
- B. RestartLimit
- C. ToleranceLimit
- D. OfflineTimeout
- E. OfflineMonitorInterval

Answer: BC

6. Under which condition can a service group be AutoDisabled?

- A. when hashadow cannot restart HAD on a system
- B. when the system is in a jeopardy membership
- C. when a firm service group dependency exists between two service groups and the parent service group fails
- D. when a firm service group dependency exists between two service groups and the child service group fails

Answer: A

7. What is the default level of authorization of a new VCS user?

- A. Cluster Administrator
- B. Cluster Operator
- C. Cluster Guest
- D. Group Administrator
- E. Group Operator

Answer: C

8. Which attribute enables VCS to bring a resource online after it goes offline unexpectedly and before faulting the resource?

- A. RestartLimit
- B. OnlineRestartLimit
- C. AutoRestartLimit
- D. OnlineRetryLimit

Answer: A

9. Which conditions are recommended for a successful VCS patch installation? (Choose two.)

- A. The clustered application must be shut down.
- B. VCS must be shut down only on the server being patched.
- C. VCS must be shut down on all cluster nodes.
- D. GAB and LLT must be shut down on all cluster nodes.
- E. GAB and LLT must remain running and connected.

Answer: CD

10. Which directive in the llttab file defines a network interface for a heartbeat?

- A. nic
- B. link
- C. heartbeat
- D. hbdev

Answer: B

11. Which components are installed when you execute the installvcs script? (Choose two.)

- A. bundled agents
- B. database agents
- C. cluster file system
- D. GAB driver
- E. cluster volume manager

Answer: AD

12. During a test of a NIC resource the VCS engine log indicates that the service group and the IP resource enter the FAULTED state on all systems in the cluster. The NIC resource enters the ONLINE state after the root cause of the fault is corrected. Which default attribute setting allows the service group to attempt to start without manual intervention?

- A. AutoStart
- B. AutoClear
- C. AutoRestart
- D. AutoFailover

Answer: C

13. Which text files are created at the end of a successful run of installvcs -installonly? (Choose three.)

- A. log
- B. response
- C. gabtab
- D. llttab
- E. summary

Answer: ABE

14. Which feature of VCS can prevent overloading of a system's resources in the event of service group failover?

- A. Parallel Service Groups
- B. Capacities
- C. Limits
- D. Load Failover Policy

Answer: C

15. Which VCS resource attribute setting prevents VCS from interpreting a Monitor entry point timeout as a resource fault?

- A. MonitorFault=0
- B. MonitorFaultTimeout=240
- C. FaultMonitor=240
- D. FaultOnMonitor=4

Answer: D

16. Which statement is true about the violation trigger?
- A. A violation trigger must be written as a shell script.
 - B. A violation trigger and notification are mutually exclusive.
 - C. A violation trigger is dependent on notification to work.

Answer: D

17. Which attributes impact service group failover? (Choose three.)
- A. FailOver
 - B. AutoFailOver
 - C. Faulted
 - D. FaultPropagation
 - E. Frozen

Answer: BDE

18. You are adding a system to a running cluster. You have successfully performed these steps on the system that you are adding:

1. installed, configured, and tested all application resources required
2. installed VCS
3. configured and started VCS communications (LLT and GAB)

What is the next step that you perform?

- A. update the resource attributes to enable resources to run on the new system
- B. update the service group attributes to enable groups to run on the new system
- C. change the cluster attribute for VCS user names to match accounts on the new system
- D. change the owner of the system attributes so that all cluster systems are the same

Answer: B

19. Which procedure must be followed to remove the resource type TypeA from an active VCS cluster?

- A. remove all resources of TypeA, remove TypeA, and remove TypeA packages
- B. remove TypeA, then execute the hatype esync command
- C. stop VCS, remove all resources of TypeA, and start VCS
- D. execute the hatype -remove command which will remove all the resources

Answer: A

20. VCS is to be installed in a secure environment where remote installation between systems is impossible. The VCS configuration parameters were captured in a file using the installation script on the first system. What can be used to read the contents of the configuration file when executing locally on the remaining systems?

- A. -autoconfig
- B. -configfile
- C. -vcsconfig
- D. -responsefile

Answer: D
