

250-700 Symantec Certified Security program

Symantec Implementation & Custom. of HA Solutions for Windows using VCS 4.1

250-700: Implementation & Custom. of HA Solutions for Windows using VCS 4.1

Practice Exam: 250-700 Exams

Exam Number/Code: 250-700

Exam Name: Implementation & Custom. of HA Solutions for Windows using VCS 4.1

Questions and Answers: 73 Q&As

([Symantec Certified Security program](#))

Exam : [250-700](#)

Symantec Certified Security program [250-700](#) Braindumps Q&A are created by senior IT lecturers in Just4Exam certification Q&A network and Symantec Certified Security program product experts combination PROMETRIC or VUE true-to-date environmental examination of the original title.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Symantec Symantec Certified Security program 250-700** examination of original title complete coverage. Just4Exam **250-700 Braindumps** Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: 250-700

Exam Name: Implementation & Custom. of HA Solutions for Windows using VCS 4.1(Symantec Certified Security program)

Questions and Answers: 73 Q&A

Just4Exam provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 250-700 Exam.

250-700 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Symantec Certified Security program product experts, included the current newest 250-700 examination questions.

3. 100% Guarantee to Pass Your Symantec Certified Security program exam and get your Symantec Certified Security program Certification.

All will purchase "250-700 Q&A" customers will obtain refund money after-sale commitments if do not pass the exam, And enjoy the upgrade Q&A service for free in one year. Ensure customers a pass rate. Just4Exam helps you one time pass the Symantec Certified Security program 250-700 tests.

We promised that use Just4Exam Q&A ensure you pass the exam at your first try.

1. The Q&A are from cooperation exam center of the real original title, summarized by our professional team and collated by senior IT lectured in co-training center to make sure the professional quality of the Q&A. The correctly of the Q&A is 100%, the coverage of 250-700 Q&A are more than 96%. All you need to study the whole 250-700 Q&A before you participate the certification exam, it should be possible to easily complete the exam and pass the

certification.

2. Just4Exam to all the Q&A, we promised "do not pass the exam give you a full refund". If you buy our 250-700 Q&A and did not pass the exam at the first try. You can take the examination report card that stamped with PROMETRIC or VUE test centers Seal. we will refund your full cost of 250-700 Q&A, absolutely guarantee you interests have no losses.(For a full refund details)

3. Just4Exam professional IT Q&A vendors, we provide well after-sale service. To all the customers buy the Q&A, we provide track service. when you buy the Q&A with in one year. you can enjoy the upgrade Q&A service for free. If in this period, the certified test center change the 250-700 Q&A, we will update the Q&A in the first time, and provide you the download update for free.

[Symantec 250-700](#) Test belongs to one of the Symantec Certified Security program certified test, if needs to obtain the Symantec Certified Security program certificate, you also need to participate in other related test, the details you may visit the [Symantec Certified Security program](#) certified topic, in there, you will see all related Symantec Certified Security program certified subject of examination.

250-700

Just4Exam professional provide Symantec Certified Security program 250-700 the newest Q&A, completely covers 250-700 test original topic. With our complete Symantec Certified Security program resources, you will minimize your Symantec Certified Security program cost and be ready to pass your 250-700 tests on Your First Try, 100% Money Back Guarantee included!

Just4Exam Engine Features

Comprehensive questions and answers about 250-700 exam

250-700 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

250-700 exam questions updated on regular basis

Same type as the certification exams, 250-700 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 250-700 exam demo before you decide to buy it in Just4Exam.com

Just4Exam Help You Pass Any IT Exam

[Just4Exam.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Symantec 250-700

Title : Implementation of HA Solutions for Windows using VCS 4.1

1. Which three elements are components of a base VCS installation? (Choose three.)

- A. bundled agents
- B. custom agents
- C. PERL
- D. GAB Drivers
- E. cluster simulator

Answer: ACD

2. You are the administrator of a VCS cluster. You want to add another system to the cluster. Which two security

group memberships are required on the new system to add the system to the cluster? (Choose two.)

- A. Domain Administrator
- B. Enterprise Administrator
- C. Local Administrator
- D. Domain User

Answer: AC

3. You are planning to install both VERITAS Cluster Server and VERITAS Storage Foundation. You will also be changing the application environment over the course of the next 18 months. Increasing the number of _____ will require modification of the VCS configuration. (Choose three.)

- A. highly available applications
- B. file systems used by the highly available applications
- C. disk groups used by the highly available applications
- D. disks in the disk group used by the highly available applications

Answer: ABC

4. There is a requirement for an application to remain online when a public network interface fails in a two-system VCS cluster. Which hardware configuration is required to configure this behavior in VCS?

- A. Multiple public network interfaces must be present on each system.
- B. One network interface per system will work as long as two or more switches are present.
- C. VCS will fail over the application any time any network interface fails on a system.
- D. Multiple network interfaces must be on the same controller card on each system.

Answer: A

5. VCS needs to be patched on systems running in a production environment. There are two service groups currently running in a cluster that has two systems. VCS must be stopped on all systems in the cluster in order to apply the patch without any application downtime. What is the proper VCS command to accomplish this?

- A. `hastop -all`
- B. `hastop -all -force`
- C. `hapause -upgrade`
- D. `hasys -stop`

Answer: B

6. During VCS configuration, the VCS notifier is to be configured to send messages to the SNMP console named `snmpserv`. Which two additional pieces of information are needed to configure the notifier for SNMP? (Choose two.)

- A. the location of the SNMP VCS MIB
- B. the port number to use on the console
- C. the e-mail address of the user to whom to send traps
- D. the severity of messages to send to the console
- E. the user name on the system in which to send the messages

Answer: BD

7. Which two security group memberships are required to add a system to a cluster? (Choose two.)

- A. Domain Administrator in the domain
- B. Enterprise Administrator in the domain
- C. Local Administrator for the new system
- D. Domain User in the domain

Answer: AC

8. Click the Exhibit button.

The diagram shows a proposed HA configuration.

What effect would configuring the public NIC to handle low-priority heartbeats have?

- A. provides additional protection from split brain

- B. improves LLT and GAB traffic load balance
- C. prevents the cluster from going into jeopardy if both private heartbeats fail
- D. provides additional availability for the public NIC

Answer: A

9. Which two things need to be confirmed before installing VCS? (Choose two.)

- A. verify that all required Operating System patches are installed on each system
- B. verify that private Ethernet heartbeats reside on consecutive network subnets
- C. identify the Cluster ID of any other VCS cluster with heartbeat connections on the same subnet
- D. all applications that are to be clustered are offline prior to installing VCS
- E. ensure that one system is set up as a license manager for all applications that will be clustered

Answer: AC

10. Which command is used to install VCS for Windows in an unattended mode?

- A. setup.exe
- B. vxinstall.exe
- C. install.exe
- D. vxsilent.exe

Answer: A

11. What are two functions of service group dependencies? (Choose two.)

- A. provide a mechanism by which service groups can fail over based on network bandwidth availability
- B. control VCS user parameters following events like faults, auto group start, and system shutdown
- C. provide a mechanism by which two service groups can be linked by rules similar to the way that resources are linked
- D. provide a mechanism by which two service groups can change their resource structure during failover
- E. control where VCS brings a group online following events like faults, auto group start, and system shutdown

Answer: CE

12. You can determine if resource attributes are valid in VCS by running the _____.

- A. hares -probe command and checking the VCS probe log
- B. hares -probe command and checking the VCS engine log
- C. haprobe -resource command and checking the VCS resource log
- D. haprobe -resource command and checking the VCS engine log

Answer: B

13. AutoStartList is dependent on which service group attribute?

- A. SystemList
- B. SystemPolicy
- C. FailoverList
- D. FailoverPolicy

Answer: A

14. How many systems in the cluster can the NotifierMngr run on at one time?

- A. 1
- B. 2
- C. 4
- D. an unlimited number

Answer: A

15. You want to verify that systems are suitable for a VCS clustered application. Which three items do you verify on the systems? (Choose three.)

- A. operating system licenses

- B. operating system patch levels
- C. amount of memory in each system
- D. systems listed in VCS Hardware Compatibility List

Answer: BCD
