

350-022 CCIE

Cisco CCIE Written, Service Provider: DSL

350-022: CCIE Written, Service Provider: DSL

Practice Exam: 350-022 Exams

Exam Number/Code: 350-022

Exam Name: CCIE Written, Service Provider: DSL

Questions and Answers: 400 Q&As

([CCIE](#))

Exam : [350-022](#)

CCIE [350-022](#) Braindumps Q&A are created by senior IT lecturers in Just4Exam certification Q&A network and CCIE product experts combination PROMETRIC or VUE true-to-date environmental examination of the original title.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Cisco CCIE 350-022** examination of original title complete coverage. Just4Exam **350-022 Braindumps** Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: 350-022

Exam Name: CCIE Written, Service Provider: DSL(CCIE)

Questions and Answers: 400 Q&A

Just4Exam provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 350-022 Exam.

350-022 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the CCIE product experts, included the current newest 350-022 examination questions.

3. 100% Guarantee to Pass Your CCIE exam and get your CCIE Certification.

All will purchase "350-022 Q&A" customers will obtain refund money after-sale commitments if do not pass the exam, And enjoy the upgrade Q&A service for free in one year. Ensure customers a pass rate. Just4Exam helps you one time pass the CCIE 350-022 tests.

We promised that use Just4Exam Q&A ensure you pass the exam at your first try.

1. The Q&A are from cooperation exam center of the real original title, summarized by our professional team and collated by senior IT lectured in co-training center to make sure the professional quality of the Q&A. The correctly of the Q&A is 100%, the coverage of 350-022 Q&A are more than 96%. All you need to study the whole 350-022 Q&A before you participate the certification exam, it should be possible to easily complete the exam and pass the certification.

2. Just4Exam to all the Q&A, we promised "do not pass the exam give you a full refund". If you buy our 350-022 Q&A and did not pass the exam at the first try. You can take the examination report card that stamped with PROMETRIC or VUE test centers Seal. we will refund your full cost of 350-022 Q&A, absolutely guarantee you interests have no losses. (For a full refund details)

3. Just4Exam professional IT Q&A vendors, we provide well after-sale service. To all the customers buy the Q&A, we provide track service. when you buy the Q&A with in one year. you can enjoy the upgrade Q&A service for free. If in this period, the certified test center change the 350-022 Q&A, we will update the Q&A in the first time, and provide you the download update for free.

[Cisco 350-022](#) Test belongs to one of the CCIE certified test, if needs to obtain the CCIE certificate, you also need to participate in other related test, the details you may visit the [CCIE](#) certified topic, in there, you will see all related CCIE certified subject of examination.

350-022

Just4Exam professional provide CCIE 350-022 the newest Q&A, completely covers 350-022 test original topic. With our complete CCIE resources, you will minimize your CCIE cost and be ready to pass your 350-022 tests on Your First Try, 100% Money Back Guarantee included!

Just4Exam Engine Features

Comprehensive questions and answers about 350-022 exam

350-022 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

350-022 exam questions updated on regular basis

Same type as the certification exams, 350-022 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free 350-022 exam demo before you decide to buy it in Just4Exam.com

Just4Exam Help You Pass Any IT Exam

[Just4Exam.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Cisco 350-022

Title : CCIE Written, Service Provider: DSL

1. What will significantly degrade DSL performance, regardless of DSL rate or line length?

- A. POTS splitters at the subscriber's end of the DSL line
- B. POTS splitters at the telco C.O
- C. Microfilters installed between a telephone and shared line
- D. Radio-frequency filters on the telephone line

Answer: D

2. OSPF is defined on a Frame Relay interface providing point-to-multipoint connections. The remote neighbors can reach this central site, but are complaining of routing failures between each of the remote sites. The central router has all the routes for each remote site. Based on this information, what can be diagnosed as the biggest potential problem?

- A. An over-subscribed Frame Relay switch will cause some packet loss.
- B. There are problems in the use of OSPF Authentication.
- C. There is an incorrect selection of the Designated Router.
- D. There is an incorrect DLCI assigned on a point-to-point sub-interface.

Answer: D

3. What is Forwarding Equivalence Class assignment NOT likely to be based upon?

- A. Fragment offset
- B. Destination address
- C. Application protocol
- D. Class of service

Answer: A

4. The following are wire sizes used in telephone company cables. What will allow the best overall DSL performance?

- A. 7 kft (2.1 km) of #26 AWG (0.4 mm) cable
- B. 9 kft (2.75 km) of #26 AWG (0.4 mm) cable
- C. 7 kft (2.1 km) of #24 AWG (0.5 mm) cable
- D. 9 kft (2.75 km) of #24 AWG (0.5 mm) cable

Answer: C

5. A DSL customer has subscribed to a service that provides 2 mbps downstream and 256 kbps upstream. The cable length is 10 kft (3 km). The customer reports that file transfers on the DSL line seem slower than normal in recent days. After reviewing the DSL profile parameters for the DSL port, and the actual status of the line, what is the possible reason why the subscriber's data rates are slower than usual?

```
DSLAM#show dsl int atm 1/1DMT profile
parameters
Maximum Bitrates:Interleave Path: downstream: 2048 kb/s, upstream: 256 kb/sFast Path: downstream: 0
kb/s, upstream: 0 kb/sMinimum Bitrates:Interleave Path: downstream: 0 kb/s, upstream: 0 kb/sFast Path:
downstream: 0 kb/s, upstream: 0 kb/sMargin: downstream: 6 dB, upstream: 6 dBInterleaving Delay: downstream:
16000 usecs, upstream: 16000 usecsCheck Bytes (FEC):Interleave Path: downstream: 16, upstream: 16Fast Path:
downstream: 0, upstream: 0R-S Codeword Size: downstream: auto, upstream: autoTrellis Coding: DisabledOverhead
Framing: Mode 3Operating Mode: AutomaticTraining Mode: QuickMinrate blocking: DisabledSNR Monitoring:
DisabledStatus:Bitrates:Interleave Path: downstream: 640 kb/s, upstream: 256 kb/sFast Path: downstream: 0 kb/s,
upstream: 0 kb/sMargin: downstream: 6 dB, upstream: 9 dBAttenuation: downstream: 45 dB, upstream: 31
dBInterleave Delay: downstream: 16000 usecs, upstream: 16000 usecTransmit Power: downstream: 14 dB, upstream:
12.0 dBCheck Bytes (FEC):Interleave Path: downstream: 16, upstream: 16Fast Path: downstream: 0, upstream: 0R-S
Codeword Size: downstream: 1, upstream: 8Trellis Coding: Not In UseOverhead Framing: Mode 3Line Fault:
NONEOperating Mode: ITU G dmt Issue 1Line Type: Interleaved Only
```

- A. The signal-to-noise margin on the line will not allow downstream DSL rates faster than 640 kbps. If the subscriber's service was in fact faster at some time, then something has changed in the line characteristics or noise spectrum.
- B. The subscriber is provisioned for 640 kbps downstream, and the service appears to be working normally. The problem is apparently not related to the DSL (physical layer) part of the service.
- C. The service is running in G.DMT, and 640 kbps is normal for the subscriber's cable length. Change the mode to ANSI T1.413 for faster rates.
- D. The DSL profile is set for 16 milliseconds interleave delay. Change the interleave delay to 0, or change the profile to fastpath for faster line rates.

Answer: A

6. The following are wire sizes used in telephone company cables. Which will allow the greatest "reach" (distance) in DSL service?

- A. 24 AWG (0.5 mm)
- B. 26 AWG (0.4 mm)
- C. A line that is 50% of #24 (0.5mm) and 50 % of #26 (0.4mm).
- D. None of the above will allow enough reach for DSL service.

Answer: A

7. How should OSPF be configured on Router B?

- A. router ospf network 108.3.0.0
- B. router ospf 1 network 108.3.100.0 0.0.0.255 area 6 network 108.3.2.0 0.0.0.255 area 6
- C. router ospf 1 network 108.3.100.0 0.0.0.255 area 6 network 108.3.2.0 0.0.0.255 area 0
- D. router ospf 1 network 108.3.100.0 255.255.255.0 area 6 network 108.3.2.0 255.255.255.0 area 6

E. router ospf 1network 108.3.1.0 0.0.0.255 area 6network 108.3.100.0 0.0.0.255 area 6network 108.3.2.0 0.0.0.255 area 6

Answer: B

8. Three of the following are common symptoms of a bridge tap ("half tap") on a DSL line. Which three are symptoms that result from placing a bride tap on a DSL line?

- A. The line may not train.
- B. The DSL service will interfere with telephone (POTS) service on the same line.
- C. DSL line rates will be lower than expected (lower than provisioned).
- D. The line may have degraded DSL service, but POTS service may appear normal.

Answer: ACD

9. The function of the ATU-R is:

- A. To multiplex xDSL signals into the network core.
- B. To provide a network connection for the end-user.
- C. To split ADSL bandwidth from telephony bandwidth.
- D. To switch ATM cells received from CPE.
- E. To extend xDSL signals past the distance limitation.

Answer: B

10. Within OSPF, what functionality best defines the use of a 'stub' area?

- A. It appears only on remote areas to provide connectivity to the OSPF backbone.
- B. It is used to inject the default route for OSPF.
- C. It uses the no-summary keyword to explicitly block external routes, defines the non-transit area, and uses the default route to reach external networks.
- D. It is a non-transit area that does not allow flooding of external networks and uses the default route to reach external networks.

Answer: C

11. What is the effect of changing DMT interleaved delay from 16 milliseconds to 2 milliseconds?

- A. Fewer ATM PVCs can be provisioned on the DSL line.
- B. Latency is reduced, but error correction effectiveness may also be reduced.
- C. Latency remains the same, but faster error correction occurs.
- D. Latency remains the same, but throughput is increased.

Answer: B

12. The two label distribution protocols that provide support for MPLS traffic engineering are:

- A. RSVP and OSPF
- B. CR-LDP and IBGP
- C. RSVP and CR-LDP
- D. LPS and LDS

Answer: C

13. What effect do load coils in a telephone line have on DSL service?

- A. Load coils cause low trained rates for ADSL (CAP or DMT), but do not degrade SDSL, SHDSL, or IDSL transmission.
- B. Load coils in the telephone line can prevent any DSL modem from training up to an ATU-C port.
- C. Load coils cause low upstream rates, but do not degrade downstream rates.
- D. Load coils cause low downstream rates, but do not degrade upstream rates.
- E. Load coils cause low trained rates for SDSL, SHDSL, or IDSL, but do not degrade ADSL (CAP or DMT) transmission.

Answer: B

14. The telephone company has placed a bridge-tap (half-tap) on all the pairs in a cable in preparation to reroute the cable. DSL customers are served by this cable. Three of the following five statements are correct. Which three of the following statements describes the possible effect of placing bride-taps on a DSL line? (multiple answer)

- A. It may not cause a problem, depending on the location and length of the half taps.
- B. It can cause the DSL modems to train at lower line rates.
- C. It will degrade upstream rates (lower frequencies), but will not degrade downstream rates (higher frequencies).
- D. DSL modems operating at 15 kft (4.5 km) of cable may not train after the bridge-taps are installed.
- E. Bridge-taps will not cause a problem for DSL service unless a telephone or modem is connected at the end of the new cable (half-tap) section, or unless the new section is shorted.

Answer: ABD

15. What best describes RADSL?

- A. The DSL line trains at the highest rate possible, limited mainly by line conditions and provisioning options.
- B. The DSL line rate (bandwidth) is automatically increased when data queues are filled to a predetermined threshold.
- C. The DSL line rate remains constant while noise margins are automatically adjusted.
- D. The DSL modems detect the presence of CAP, DMT, SDSL, or G.SHDSL modulation at the receiver input and automatically select the appropriate mode to transmit.

Answer: A

16. MPLS traffic engineering routing information is carried by:

- A. BGP MEDs
- B. MP-BGP
- C. OSPF Opaque LSAs or IS-IS TLVs
- D. RTP or RTCP packets

Answer: C

17. Which three are major inhibitors of ADSL line quality? (multiple answer)

- A. Bridge Taps
- B. Distance
- C. Squirrels
- D. Load Coils
- E. Line shared by a telephone

Answer: ABD

18. MPLS does not support:

- A. Multicast
- B. OSPF
- C. BGP
- D. Multicast and OSPF

Answer: A

19. CIDR is primarily used:

- A. In BGP only
- B. For classless routing
- C. In OSPF only
- D. In EIGRP only

Answer: B

20. A DSL modem will not train up. It is on a "shared line" (DSL and POTS), and the telephone on the shared line is working normally. Nine of the ten conditions are possible causes of the symptom, and one is not. What is NOT a possible cause of the problem?

- A. A defective DSL line card in the DSLAM
- B. A defective DSL CPE modem

- C. An open (cut or broken) tip or ring lead on the phone line between the customer premises and the telco C.O
- D. The DSL port in the DSLAM is in "shutdown" state
- E. The DSL port in the CPE DSL modem is in "shutdown" state
- F. The DSL operating mode in the DSLAM does not match the operating mode of the CPE DSL modem
- G. A loose cable between the telco POTS splitter and DSLAM
- H. A loose or broken connection between the DSL modem and telephone line
- I. An incorrectly connected POTS splitter between the DSL modem and telephone line
- J. A DSL microfilter was accidentally installed in the DSL line between the DSL modem and DSL line

Answer: C
