([Linux/GNU Certified Administrator\(LCA\)](#))

Linux/GNU Certified Administrator(LCA) [3x0-104](#) Braindumps Q&A are created by senior IT lecturers in Just4Exam certification Q&A network and Linux/GNU Certified Administrator(LCA) product experts combination PROMETRIC or VUE true-to-date environmental examination of the original title. Exam : [3x0-104](#)

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **SAIR Linux/GNU Certified Administrator(LCA) 3x0-104** examination of original title complete coverage.Just4Exam **3x0-104 Braindumps** Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 3x0-104

Exam Name: level 1 security.ethics and privacy([Linux/GNU Certified Administrator\(LCA\)](#))

Questions and Answers: 50 Q&A

Just4Exam provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the 3x0-104 Exam.

3x0-104 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Linux/GNU Certified Administrator(LCA) product experts, included the current newest 3x0-104 examination questions.

3. 100% Guarantee to Pass Your Linux/GNU Certified Administrator(LCA) exam and get your Linux/GNU Certified Administrator(LCA) Certification.

All will purchase "3x0-104 Q&A" customers will obtain refund money after-sale commitments if do not pass the exam, And enjoy the upgrade Q&A service for free in one year. Ensure customers a pass rate.Just4Exam helps you one time pass the Linux/GNU Certified Administrator(LCA) 3x0-104 tests.

We promised that use Just4Exam Q&A ensure you pass the exam at your first try.

1. The Q&A are from cooperation exam center of the real original title,summaried by our professional team and collated by senior IT lectured in co-training center to make sure the professional quality of the Q&A.The correctly of the Q&A is 100%, the coverage of 3x0-104 Q&A are more than 96%.All you need to study the whole 3x0-104 Q&A before you participate the certification exam,it should be possible to easily complete the exam and pass the certification.

2. Just4Exam to all the Q&A, we promised "do not pass the exam give you a full refund". If you buy our 3x0-104 Q&A and did not pass the exam at the first try. You can take the examination report card that stamped with PROMETRIC

or VUE test centers Seal. we will refund your full cost of 3x0-104 Q&A, absolutely guarantee you interests have no losses.(For a full refund details)

3. Just4Exam professional IT Q&A vendors, we provide well after-sale service. To all the customers buy the Q&A, we provide track service. when you buy the Q&A with in one year. you can enjoy the upgrade Q&A service for free. If in this period, the certified test center change the 3x0-104 Q&A, we will update the Q&A in the first time, and provide you the download update for free.

[SAIR 3x0-104](#) Test belongs to one of the Linux/GNU Certified Administrator(LCA) certified test, if needs to obtain the Linux/GNU Certified Administrator(LCA) certificate, you also need to participate in other related test, the details you may visit the [Linux/GNU Certified Administrator\(LCA\)](#) certified topic, in there, you will see all related Linux/GNU Certified Administrator(LCA) certified subject of examination.

3x0-104

Just4Exam professional provide Linux/GNU Certified Administrator(LCA) 3x0-104 the newest Q&A, completely covers 3x0-104 test original topic. With our complete Linux/GNU Certified Administrator(LCA) resources, you will minimize your Linux/GNU Certified Administrator(LCA) cost and be ready to pass your 3x0-104 tests on Your First Try, 100% Money Back Guarantee included!

Just4Exam Engine Features

Comprehensive questions and answers about 3x0-104 exam

3x0-104 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

3x0-104 exam questions updated on regular basis

Same type as the certification exams, 3x0-104 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Exam : SAIR 3X0-104

Title : level 1 security.ethics and privacy

1. The system administrator wants to log all of the kernel messages (e.g. kernel panics) to a file instead of having the messages go to the console (e.g. /dev/console). Which file should she edit, and what line in the file should she add, to perform this duty?

- A. /etc/klog.conf; kern /var/log/kernel.log
- B. /etc/logd; kernel. /var/log/kernel.log
- C. /etc/syslog.conf; notice /var/log/kernel.log
- D. /etc/syslog.conf; kern /var/log/kernel.log
- E. /etc/klog.conf; .notice /var/log/kernel.log

Answer: D

2. Jim, who has recently been promoted to network administrator, wants to specify rules for routing. However, he is unsure about how router packet filters parse and apply rules. Which of the following are TRUE regarding router packet filtering? (Choose two.)

- A. Rules are checked against packets by parsing the body of the packet for information in a way similar to the method the grep program uses to parse text files.
- B. The packet headers are parsed and tested against the routing rules.
- C. Packet filtering rules can be applied to inbound and outbound network interfaces.
- D. Router packet filters remove headers from packets and apply rules based on the content of the packet.

Answer: BC

3. A large server has many services running, including FTP, NFS, and NIS. It is hard for the administrator to find security holes in the services' configuration files, and this leads to possible security risks. Which of the following tools could the administrator use to check these services for security holes?

- A. NTOP
- B. LogCheck
- C. SAINT
- D. Tripwire

Answer: C

4. An administrator finds a program on a network server that modifies several system service records when a certain user logs in and out. The program masks the intruder's actions. This is most likely an example of what type of a _____.

- A. Trojan horse
- B. Worm
- C. Back door
- D. Logic bomb

Answer: D

5. Kathryn wants to maximize security on her system by replacing ftpd with a program that logs requests, denies unauthorized users, and runs the original ftpd daemon. What should Kathryn use?

- A. TCP wrappers
- B. A VPN
- C. Tripwire
- D. Packet filters

Answer: A

6. Tom, a system administrator for ServerA, is interested in security and has written a script that scans the password file for unauthorized promotion to root status. Which of the following should the script check? (Choose two.)

- A. A UID number that has been set to one
- B. A UID number that has been set to zero
- C. An account with the GID set to
- D. A user with a non-standard shell (i.e., `"/bin/runasroot"`)
- E. An account with the UID set to

Answer: BD

7. Tom is a system administrator for Linux ServerA. Tom is running a Perl script that will initiate a connection request from ServerA to ServerB without completing the network connection. This is done multiple times until ServerB can no longer communicate on the network. What kind of attack has Tom initiated?

- A. Spam blast
- B. TCP bomb
- C. Denial of Service
- D. Internet Worm

Answer: C

8. A malicious user has sent thousands of TCP connection requests to a server from various forged IPs. The server

does not receive acknowledgments from any of the requesting clients because they do not exist. The massive strain on the server causes it to crash. This is an example of what type of Denial of Service (DoS) attack?

- A. SYN flood
- B. ICMP flood
- C. Smurf attack
- D. Buffer overflow

Answer: A

9. An administrator has implemented a chain of router packet filtering rules on a major system server. A user has sent a packet to the network protected by the packet filter. The packet originated from 190.15.65.0/24 and is destined for 212.220.0.0/16. Considering the chain of packet filtering rules below, what will happen to the packet and why?

rule source destination action

- A 190.15.60.0/24 212.220.0.0/16 deny
- B 212.220.0.0/16 190.15.65.0/24 deny
- C 190.15.0.0/16 212.220.0.0/16 permit
- D 0.0.0.0/0 0.0.0.0/0 deny

- A. The packet will be permitted because no rules apply.
- B. The packet will be permitted because it matches rule C.
- C. The packet will be denied because all sources and destinations are blocked by rule D.
- D. The packet will be denied because the packet matches rule A.

Answer: B

10. Which of the following describes the contents of the /var/log/btmp log file?

- A. It stores only the users' real names and their login times.
- B. It contains a list of failed login attempts in a format similar to the wtmp log file.
- C. It contains all successful superuser login attempts.
- D. It contains a list of all users currently logged in to the system, along with their IP addresses.

Answer: B
