

## A00-203 SAS Institute Systems Certification

### SAS Institute sas warehouse development specialist concepts exam

**A00-203: sas warehouse development specialist concepts exam**

**Practice Exam:** A00-203 Exams

**Exam Number/Code:** A00-203

**Exam Name:** sas warehouse development specialist concepts exam

**Questions and Answers:** 65 Q&As

( [SAS Institute Systems Certification](#) )

SAS Institute Systems Certification [A00-203](#) Braindumps Q&A are created by senior IT lecturers in Just4Exam certification Q&A network and SAS Institute Systems Certification product experts combination PROMETRIC or VUE true-to-date environmental examination of the original title. Exam : [A00-203](#)

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **SAS Institute SAS Institute Systems Certification A00-203** examination of original title complete coverage. Just4Exam **A00-203 Braindumps** Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

**VUE/Prometric Code: A00-203**

Exam Name: sas warehouse development specialist concepts exam( SAS Institute Systems Certification )

Questions and Answers: 65 Q&A

#### **Just4Exam provide the professional Q&A.**

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the A00-203 Exam.

A00-203 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the SAS Institute Systems Certification product experts, included the current newest A00-203 examination questions.

3. 100% Guarantee to Pass Your SAS Institute Systems Certification exam and get your SAS Institute Systems Certification Certification.

All will purchase "A00-203 Q&A" customers will obtain refund money after-sale commitments if do not pass the exam, And enjoy the upgrade Q&A service for free in one year. Ensure customers a pass rate. Just4Exam helps you one time pass the SAS Institute Systems Certification A00-203 tests.

#### **We promised that use Just4Exam Q&A ensure you pass the exam at your first try.**

1. The Q&A are from cooperation exam center of the real original title, summarized by our professional team and collated by senior IT lectured in co-training center to make sure the professional quality of the Q&A. The correctly of the Q&A is 100%, the coverage of A00-203 Q&A are more than 96%. All you need to study the whole A00-203 Q&A before you participate the certification exam, it should be possible to easily complete the exam and pass the certification.

2. Just4Exam to all the Q&A, we promised "do not pass the exam give you a full refund". If you buy our A00-203 Q&A and did not pass the exam at the first try. You can take the examination report card that stamped with PROMETRIC

or VUE test centers Seal. we will refund your full cost of A00-203 Q&A, absolutely guarantee you interests have no losses.(For a full refund details)

3. Just4Exam professional IT Q&A vendors, we provide well after-sale service. To all the customers buy the Q&A, we provide track service. when you buy the Q&A with in one year. you can enjoy the upgrade Q&A service for free. If in this period, the certified test center change the A00-203 Q&A, we will update the Q&A in the first time, and provide you the download update for free.

**[SAS Institute A00-203](#)** Test belongs to one of the SAS Institute Systems Certification certified test, if needs to obtain the SAS Institute Systems Certification certificate, you also need to participate in other related test, the details you may visit the [SAS Institute Systems Certification](#) certified topic, in there, you will see all related SAS Institute Systems Certification certified subject of examination.

A00-203

Just4Exam professional provide SAS Institute Systems Certification A00-203 the newest Q&A, completely covers A00-203 test original topic. With our complete SAS Institute Systems Certification resources, you will minimize your SAS Institute Systems Certification cost and be ready to pass your A00-203 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Exam Engine Features**

Comprehensive questions and answers about A00-203 exam

A00-203 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

A00-203 exam questions updated on regular basis

Same type as the certification exams, A00-203 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free A00-203 exam demo before you decide to buy it in Just4Exam.com

### **Just4Exam Help You Pass Any IT Exam**

**[Just4Exam.com](#)** offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : SAS A00-203

Title : SAS Warehouse Development Specialist Concepts Exam

1. All possible test cases according to the business rules are run using generated data. Which of the following is the impact of using this data in the initial testing and development process?

- A. The physical data model of the warehouse can be tested.
- B. The developer can predict the production storage requirements.
- C. The developer can predict the results of the input source processes.
- D. Integrity problems in the source data can be identified early in the development life cycle.

Answer: A

2. Which of the following validate the transfer of binary files between systems?

- A. using a checksum and checking the file size
- B. using a checksum and comparing the first and last N records
- C. using record counts and comparing a random sample of records
- D. checking the file size and comparing a random sample of records

Answer: A

3. Click on the Exhibit button to view a diagram that displays a data warehouse environment:

Which of the following describes the optimal method to join a transformed DB2 table with an Oracle table and load the result set to the data warehouse using SAS ETL Server and its components?

A. Generate code with SAS ETL Studio which:

connects to host 2 from host 1,  
transforms the DB2 data on host 1,  
downloads the Oracle data using the DOWNLOAD procedure to host 1,  
joins those result sets on host 1,  
downloads the joined data using the DOWNLOAD procedure to host 2,  
and populates the target data warehouse table.

B. Generate code with SAS ETL Studio which:

connects to host 2 from host 1,  
transforms the DB2 data on host 1,  
extracts the Oracle data from host 2 using Remote Library Services,  
joins those result sets on host 1,  
and loads the target data warehouse table with the joined data using Remote Library Services to host 2.

C. Generate code with SAS ETL Studio which:

connects to host 1 from host 2,  
transforms the DB2 data on host1,  
downloads the result set using the DOWNLOAD procedure,  
extracts the ORACLE data on host 2,  
joins those result sets on host 2,  
and populates the target data warehouse table.

D. Generate code with SAS ETL Studio which:

connects to host 1 from host 2,  
downloads the DB2 data using Remote Library Services,  
transforms the downloaded data on host 2,  
extracts the ORACLE data on host 2,  
joins those result sets on host 2,  
and populates the target data warehouse table.

Answer: C

4. Which of the following should be stored in the metadata for a data warehouse?

- A. business rules, logical model, and transformation rules
- B. business rules, conventions and target table data values
- C. derived data values, subject model and transformation rules
- D. business rules, target table data values and transformation rules

Answer: A

5. According to The Data Warehouse Lifecycle Toolkit, by Ralph Kimball, which of the following represent best practices when deploying a data warehouse?

- I. Enable warehouse access for all valid users at the same time.
- II. Deny warehouse access to end-users who have not received warehouse training.
- III. Provide end-users resource support for warehouse to legacy system reconciliation.
- IV. End-user education can begin shortly before the production deployment of the warehouse.

- A. III and IV only
- B. I, II and III only
- C. I, II and IV only
- D. II, III and IV only

Answer: D

6. Which of the following helps to reduce the I/O for a procedure that requires every row of a SAS table to be processed?

- A. indexing the SAS table
- B. using the SQL procedure
- C. partitioning the SAS table
- D. compressing the SAS data set

Answer: D

7. A star schema has been defined using surrogate keys for all dimensions. Changed data capture is being used to provide updates to the SALES fact table and to the PRODUCT and CUSTOMER dimension tables. Which of the following is the correct load sequence for processing the new data?

- A. 1. Update the SALES table with new data.  
2. Update the PRODUCT and CUSTOMER tables.  
3. Assign surrogate keys to the new SALES records.
- B. 1. Update the PRODUCT and CUSTOMER tables.  
2. Update the SALES table with new data.  
3. Assign surrogate keys to the new SALES records.
- C. 1. Update the PRODUCT and CUSTOMER tables.  
2. Assign surrogate keys to the new SALES records.  
3. Update the SALES table with new data.
- D. 1. Update the SALES table with new data.  
2. Assign surrogate keys to the new SALES records.  
3. Update the PRODUCT and CUSTOMER tables.

Answer: C

8. The on-line data retention policy for the warehouse requires that 36 months of data be available. There is an additional requirement that up to 60 months worth of detail data must be able to be restored on-line consistent with the on-line version. Assume that the monthly load cycle has no out of time period transaction problems. Which of the following fails to meet the requirement for 60 months of data?

- A. For a Type I dimensional star schema: Remove the facts older than 36 months, archive to tape, and snapshot the dimension tables.
- B. For a Type II dimensional star schema: Remove the facts older than 36 months, archive to tape, and snapshot the dimension tables.
- C. For a Type III dimensional star schema: Remove the facts older than 36 months, archive to tape, and snapshot the dimension tables.
- D. For a Type II dimensional star schema: Remove the facts older than 36 months and archive to tape. There is no need to snapshot the dimension tables.

Answer: A

9. Which of the following describes the dimension tables in a star schema logical design?

- A. They are normalized and can join only through the fact table.
- B. They are denormalized and can join only through the fact table.
- C. They are normalized and can join through the fact table or each other.
- D. They are denormalized and can join through the fact table or each other.

Answer: B

10. For which of the following should metadata be captured?

- A. data exploitation and data storage only
- B. extract, transform, and load (ETL) processes only
- C. data storage and extract, transform, and load (ETL) processes only
- D. data exploitation, data storage, and the extract, transform, and load (ETL) processes

Answer: D

11. In SAS ETL Studio, which one of the following transformations can be used to generate code for accessing data sources located on different hosts?

- A. Data Transfer
- B. Data Download
- C. Remote Connect
- D. Remote Services

Answer: A

12. Which of the following are considered metadata standards?

- A. DDE and XML
- B. OMG and XML
- C. JMS and OMG
- D. COM and DCOM

Answer: B

13. Which of the following must be considered when designing unit tests for the target load process?

- I. access capabilities to source data
  - II. predefined test cases that check transformation rules
  - III. validity of the data extracted from the operational data store (ODS)
  - IV. test plan with conditions and results that match the design specification
- A. II and IV only
  - B. I, II, and IV only
  - C. II, III, and IV only
  - D. I, II, III, and IV

Answer: A

14. When performing table loads, which of the following automatic data step variables can be used for error checking?

- A. \_IORC\_ and \_SYSRC\_
- B. \_ERROR\_ and \_IORC\_
- C. \_ERROR\_ and \_SYSERR\_
- D. \_SYSERR\_ and \_SYSRC\_

Answer: B

15. According to the SAS Rapid Warehousing Methodology, in which of the following phases must the acceptance test criteria be defined?

- A. final test
- B. assessment
- C. deployment
- D. requirements

Answer: D

16. Which of the following is a true statement regarding backup strategies for SAS data sets after the load has been completed?

- A. metadata must be synced
- B. file system-level backups are sufficient
- C. warehouse must be taken off-line to perform backup
- D. incremental backups can be performed based on SAS data set metadata

Answer: B

17. A star schema design requires that history information is accurately maintained for a CUSTOMER dimension. According to The Data Warehouse Lifecycle Toolkit, by Ralph Kimball, which of the following slowly changing dimension techniques is the most appropriate to update the CUSTOMER dimension?

- A. Type I

- B. Type II
- C. Type III
- D. Type IV

Answer: B

18. The contents of a data dictionary extract are listed below:  
Which of the following describes the type of metadata listed?

- A. static business metadata
- B. static technical metadata
- C. dynamic business metadata
- D. dynamic technical metadata

Answer: B

19. Which of the following steps are necessary to implement job dependencies in a SAS data warehouse?

- I. Deploy the job in SAS ETL Studio.
- II. Define job dependencies in SAS ETL Studio.
- III. Create a Job Flow in SAS Management Console.
- IV. Schedule the Job Flow in SAS Management Console.

- A. II only
- B. I and II only
- C. III and IV only
- D. I, III and IV only

Answer: D

20. Which of the following backup scenarios least impacts the data warehouse host?

- A. using network filers for storage
- B. using directly attached devices
- C. running the backup software on a separate host with a high speed NFS connection
- D. using a storage area network and running the backup software on a separate host

Answer: D
