

## E20-475 EMC Certification

### EMC Content Management Systems Architecture

**E20-475: Content Management Systems Architecture**

**Practice Exam:** E20-475 Exams

**Exam Number/Code:** E20-475

**Exam Name:** Content Management Systems Architecture

**Questions and Answers:** 231 Q&As

( [EMC Certification](#) )

EMC Certification [E20-475](#) Braindumps Q&A are created by senior IT lecturers in Just4Exam certification Q&A network and EMC Certification product experts combination PROMETRIC or VUE true-to-date environmental examination of the original title. Exam : [E20-475](#)

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **EMC EMC Certification E20-475** examination of original title complete coverage. Just4Exam **E20-475 Braindumps** Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

**VUE/Prometric Code: E20-475**

Exam Name: Content Management Systems Architecture( EMC Certification )

Questions and Answers: 231 Q&A

#### **Just4Exam provide the professional Q&A.**

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the E20-475 Exam.

E20-475 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the EMC Certification product experts, included the current newest E20-475 examination questions.

3. 100% Guarantee to Pass Your EMC Certification exam and get your EMC Certification Certification.

All will purchase "E20-475 Q&A" customers will obtain refund money after-sale commitments if do not pass the exam, And enjoy the upgrade Q&A service for free in one year. Ensure customers a pass rate. Just4Exam helps you one time pass the EMC Certification E20-475 tests.

#### **We promised that use Just4Exam Q&A ensure you pass the exam at your first try.**

1. The Q&A are from cooperation exam center of the real original title, summarized by our professional team and collated by senior IT lectured in co-training center to make sure the professional quality of the Q&A. The correctly of the Q&A is 100%, the coverage of E20-475 Q&A are more than 96%. All you need to study the whole E20-475 Q&A before you participate the certification exam, it should be possible to easily complete the exam and pass the certification.

2. Just4Exam to all the Q&A, we promised "do not pass the exam give you a full refund". If you buy our E20-475 Q&A and did not pass the exam at the first try. You can take the examination report card that stamped with PROMETRIC or VUE test centers Seal. we will refund your full cost of E20-475 Q&A, absolutely guarantee you interests have no losses. (For a full refund details)

3. Just4Exam professional IT Q&A vendors, we provide well after-sale service. To all the customers buy the Q&A, we provide track service. when you buy the Q&A with in one year. you can enjoy the upgrade Q&A service for free. If in this period, the certified test center change the E20-475 Q&A, we will update the Q&A in the first time, and provide you the download update for free.

**[EMC E20-475](#)** Test belongs to one of the EMC Certification certified test, if needs to obtain the EMC Certification certificate, you also need to participate in other related test, the details you may visit the [EMC Certification](#) certified topic, in there, you will see all related EMC Certification certified subject of examination.

E20-475

Just4Exam professional provide EMC Certification E20-475 the newest Q&A, completely covers E20-475 test original topic. With our complete EMC Certification resources, you will minimize your EMC Certification cost and be ready to pass your E20-475 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Exam Engine Features**

Comprehensive questions and answers about E20-475 exam

E20-475 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

E20-475 exam questions updated on regular basis

Same type as the certification exams, E20-475 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free E20-475 exam demo before you decide to buy it in Just4Exam.com

### **Just4Exam Help You Pass Any IT Exam**

**[Just4Exam.com](#)** offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : EMC E20-475

Title : Content Management Systems Architecture Exam

1. What is the supported procedure for rolling back an upgrade of Documentum Content Server?

- A. uninstall the current version, then reinstall the previous version
- B. run the uninstaller for the current version and run the Data Dictionary Publish job
- C. remove the directory under %DOCUMENTUM%/product for the current version, change server.ini file and dm\_server\_config, dm\_docbase\_config objects
- D. restore the system from backup

Answer: D

2. What is the correct sequence of steps for upgrading Content Server and Full-text Index Server?

- A. uninstall Full-text Index Server delete Index Agents upgrade Content Server install Index Agents install Full-text Index Server
- B. upgrade Content Server uninstall Full-text Index Server delete Index Agents install Index Agents install Full-text Index Server
- C. delete Index Agents uninstall Full-text Index Server upgrade Content Server install Full-text Index Server install Index Agents
- D. delete Index Agents upgrade Full-text Index Server upgrade Content Server install Index Agents

Answer: C

3. What is the recommended method for migrating Web Content Management (WCM) Page Builder templates, blueprints, managed links, and associated content from a production environment to a testing environment?

- A. archive and install a DocApp
- B. perform a repository-to-repository copy operation through WebPublisher
- C. execute cabinet dump and load
- D. use a deep export/import through WebPublisher

Answer: A

4. After an upgrade from a pre 5.3 version to 5.3 or 6, what can you do to remove the Verity Full-text Index components?

- A. You delete the Verity Full-text Index components via Documentum Administrator after the upgrade.
- B. The Content Server upgrade procedure deletes the Full-text. Just the empty/fulltext/Verity directory needs to be deleted in the DOCUMENTUM directory.
- C. You do not delete the Verity Full-text Index. The new Fast Full-text installation needs the data for migration.
- D. You delete the Documentum type dmi\_tdk\_index and the Full-text data in DOCUMENTUM/data directory.

Answer: B

5. You are tasked with performing a Content Server upgrade.

To accomplish this, you do the following:

You first make a repository copy of the production repository by installing the Content Server.

You then create a new repository.

You then copy the database and file storage areas from production to the new environment.

To be successful, what must be true of the new repository copy after this operation is complete?

- A. It must have the same Docbase ID as the production repository.
- B. It must have a different owner than the production repository.
- C. It must project to the same Connection Broker as the production repository.
- D. It must have the same Database Connection string as the production repository.

Answer: A

6. What is required for using Business Object Framework 2 (BOF 2)?

- A. a dfc.properties file on all client machines such as application servers
- B. a DBOR.properties and a dfc.properties file on all client machines such as application servers and a global registry repository
- C. a DBOR.properties file on all client machines and a global registry repository
- D. a global registry repository and a dfc.properties file on all client machines

Answer: D

7. What is the proper sequence of steps for upgrading Content Server and Document Transformation Services (DTS)?

- A. uninstall Content Server  
uninstall DTS  
install Content Server  
install DTS  
add DTS Support to repository
- B. remove DTS Support from repository  
uninstall DTS upgrade Content Server  
install DTS  
add DTS Support to repository
- C. upgrade Content Server  
remove DTS Support from repository  
uninstall DTS  
install DTS  
add DTS support to repository
- D. remove DTS Support from repository

upgrade Content Server  
uninstall DTS  
install DTS  
add DTS support to repository  
Answer: B

8. A client wants to upgrade their Documentum system from 5.3 SP3 to D6, but does not have the resources to upgrade and test web applications such as Webtop and Content Server components within a single downtime window. The client asks whether the upgrade can be phased, and if so which components should be upgraded first.

What is the correct response to the customer's question?

- A. Web applications must be upgraded before the Content Server.
- B. Web applications must be upgraded after the Content Server is upgraded.
- C. Web applications may be upgraded before or after the Content Server is upgraded.
- D. Web applications do not need to be upgraded to make use of D6 features.

Answer: C

9. In addition to core software upgrade considerations, which component of a Documentum system are most likely to require additional work?

- A. software use cases
- B. network topology
- C. data center architecture
- D. application customizations

Answer: D

10. Which file replaces the pre-D6 dmcl.ini?

- A. dfc.properties
- B. docbroker.ini
- C. java.ini
- D. dbor.properties

Answer: A

11. Which statement is true about the dump and load operation?

- A. Aspects associated with a dumped object are not included in the dump file.
- B. Content stored in external file storage may be included in a dump file, but blob or turbo storage may not.
- C. The source and target repositories must be the same version, but may use different code pages.
- D. Objects in the target repository will always have the same r\_object\_id as the corresponding object in the source repository.

Answer: A

12. You are planning the upgrade of your Content Server software with Branch Office Caching Service (BOCS) on a remote site. The repository has approximately one million objects with 400 GB of content and 350 GB of full-text indexes. The BOCS cache has 20 GB of content.

What must be backed up before starting with the upgrade?

- A. content, full-text index, and database
- B. content, full-text index, and BOCS cache
- C. full-text index, database, and BOCS cache
- D. content, database, and BOCS cache

Answer: A

13. Before upgrading the Content Server software, which job do you need to run to find sysobjects that point to non-existent content?

- A. Content Warning
- B. Consistency Checker

C. Dmclean

D. State of the Repository Report

Answer: B

14. A client wants to upgrade a repository from 5.2.5 to 5.3. The repository has 8 million content objects with an average size of 50K. The full text searching capability is required to be available within 24 hours of the repository upgrade. The Full-text Index Server is installed on a separate server. The upgrade is scheduled to happen in two months.

How can the client accomplish this objective?

A. configure an Index Agent in normal mode to operate against the 5.2.5 repository  
create the Full-text Indexes

run the fintegrity tool to identify documents that were not indexed, and resubmit those documents for indexing  
upgrade the Content Server and the repository

B. upgrade the Content Server and the repository  
configure an Index Agent in normal mode to operate against the upgraded repository  
create the Full-text Indexes

C. configure a 5.3 Index Agent in migration mode to operate against the 5.2.5 repository  
create the Full-text Indexes.  
run the fintegrity tool to identify documents that were not indexed, and resubmit those documents for indexing  
upgrade the Content Server and the repository  
shut down the migration-mode Index Agent and change it to a normal-mode Index Agent.

D. upgrade the Content Server and the repository  
configure an Index Agent in migration mode to operate against the upgraded repository  
create the Full-text Indexes.

shut down the migration-mode Index Agent and change it to a normal-mode Index Agent  
Answer: C

15. Which is a supported path for upgrading a Content Server to D6?

- A. 4i > 5.2.5 > 6
- B. 5.2 > 5.2.5 > 6
- C. 4i > 5.3 > 6
- D. 5.2.5 > 5.3 > 6

Answer: D

16. A client is migrating their repositories from Windows to Linux. The database server is Oracle. The content file stores are on NAS and made available over CIFS. For the migration, the client has done the following:  
installed Content Server and Oracle client on Linux using an installation owner account with the same name on Windows

copied the tnsnames.ora from Windows to Linux

configured replacement Connection Brokers

added Services entries for the repositories on the Linux Content Server environment

attached to the NAS storage using NFS

updated for each repository the web\_server\_loc, smtp\_server, r\_host\_name, r\_install\_domain, and projection target attributes for server config using SQL to reflect the new server name

Which minimal high-level steps does the client need to take to complete the migration?

A. copy all the configuration, and the aek.key files under %DOCUMENTUM%dba Windows to \$DOCUMENTUM/dba on the Linux Content Server

update the user\_auth\_target, database\_password\_file, and Docbase Projection Target fields in each server.ini  
update the appropriate dm\_location objects in the repositories using SQL to map to the new locations

B. copy all the configuration files under %DOCUMENTUM%dba Windows to \$DOCUMENTUM/dba on the Linux Content Server

update the user\_auth\_target, database\_password\_file, and Docbase Projection Target fields in each server.ini  
update the appropriate dm\_location objects in the repositories using SQL to map to the new locations

C. copy all the configuration, and the aek.key files under %DOCUMENTUM%dba Windows to \$DOCUMENTUM/dba on the Linux Content Server

update the Docbase Projection Target fields in each server.ini

update the appropriate dm\_location objects in the repositories using SQL to map to the new locations

D. copy all the configuration files under %DOCUMENTUM%dba Windows to \$DOCUMENTUM/dba on the Linux Content Server

update the database\_password\_file, and Docbase Projection Target fields in each server.ini

update the appropriate dm\_location objects in the repositories using SQL to map to the new locations

Answer: A

17. Your client's Content Servers are running on Sun/Oracle. These servers have numerous custom applications installed and have been upgraded several times. Security and regulatory considerations preclude the copying of certain production data to non-production systems. The client's configuration/change management processes and systems are incomplete or missing. You are tasked with drafting a plan to copy a repository from the production environment to a development environment in preparation for an upgrade.

Which process should you use to ensure that the new development environment is as similar to the production environment as possible?

A. install Content Server in the development environment using the same docbase id as the production environment  
use the Oracle Import/Export tools to export the production database and import it into the development environment  
modify various configuration data to conform to the development environment

copy a subset of the production content to the development storage

B. install Content Server in the development environment using the same docbase id as the production environment  
use the Dump and Load utility to transfer data and metadata from the production environment to the development environment

modify various configuration data to conform to the development environment

use DQL/DFC applications to delete potentially sensitive data from the development environment

C. copy the entire \$DOCUMENTUM directory and all subdirectories from the production to the development environment

use the Dump and Load utility to transfer data and metadata from the production environment to the development environment

modify various configuration data to conform to the development environment

D. copy the entire \$DOCUMENTUM directory and all subdirectories from the production to the development environment

use the Oracle Import/Export tools to export the production database and import it into the development environment  
modify various configuration data to conform to the development environment

create a dm\_location object and filestore in the production system pointing to the development storage

use the Migrate Content method with an appropriate DQL qualifier to copy a non-restricted subset of the production content to the development filestores

remove the new dm\_location and dm\_filestore objects

Answer: D

18. Which file(s) handle client configuration in D6?

A. dmcl.ini only

B. dfc.properties only

C. dmcl.ini and dfc.properties

D. dmclfull.ini only

Answer: B

19. Which Application Server does D6 Content Server install for its internal use?

A. BEA Weblogic

B. Oracle AS

C. Apache Tomcat

D. IBM WebSphere

Answer: A

20. A client has a Content Server, Site Caching Services (SCS), Content Transformation Services (CTS), and Full-text Indexes installed on Windows/Oracle servers. The client wants to migrate Documentum applications to Linux.

Which statement is true?

- A. The client must migrate Oracle servers to Linux.
- B. SCS is not supported on Linux.
- C. CTS is not supported on Linux.
- D. Content Server is not supported on Linux/Oracle.

Answer: C
