

HP0-728 HP MASTER ASE

HP Replication Solutions for the HP StorageWorks EVA

HP0-728: Replication Solutions for the HP StorageWorks EVA

Practice Exam: HP0-728 Exams

Exam Number/Code: HP0-728

Exam Name: Replication Solutions for the HP StorageWorks EVA

Questions and Answers: 80 Q&As

([HP MASTER ASE](#))

Exam : [HP0-728](#)

HP MASTER ASE [HP0-728](#) Braindumps Q&A are created by senior IT lecturers in Just4Exam certification Q&A network and HP MASTER ASE product experts combination PROMETRIC or VUE true-to-date environmental examination of the original title.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **HP HP MASTER ASE HP0-728** examination of original title complete coverage. Just4Exam **HP0-728 Braindumps** Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: HP0-728

Exam Name: Replication Solutions for the HP StorageWorks EVA(HP MASTER ASE)

Questions and Answers: 80 Q&A

Just4Exam provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the HP0-728 Exam.

HP0-728 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the HP MASTER ASE product experts, included the current newest HP0-728 examination questions.

3. 100% Guarantee to Pass Your HP MASTER ASE exam and get your HP MASTER ASE Certification.

All will purchase "HP0-728 Q&A" customers will obtain refund money after-sale commitments if do not pass the exam, And enjoy the upgrade Q&A service for free in one year. Ensure customers a pass rate. Just4Exam helps you one time pass the HP MASTER ASE HP0-728 tests.

We promised that use Just4Exam Q&A ensure you pass the exam at your first try.

1. The Q&A are from cooperation exam center of the real original title, summarized by our professional team and collated by senior IT lectured in co-training center to make sure the professional quality of the Q&A. The correctly of the Q&A is 100%, the coverage of HP0-728 Q&A are more than 96%. All you need to study the whole HP0-728 Q&A before you participate the certification exam, it should be possible to easily complete the exam and pass the certification.

2. Just4Exam to all the Q&A, we promised "do not pass the exam give you a full refund". If you buy our HP0-728 Q&A and did not pass the exam at the first try. You can take the examination report card that stamped with PROMETRIC or VUE test centers Seal. we will refund your full cost of HP0-728 Q&A, absolutely guarantee you interests have no losses. (For a full refund details)

3. Just4Exam professional IT Q&A vendors, we provide well after-sale service. To all the customers buy the Q&A, we provide track service. when you buy the Q&A with in one year. you can enjoy the upgrade Q&A service for free. If in this period, the certified test center change the HP0-728 Q&A, we will update the Q&A in the first time, and provide you the download update for free.

[HP HP0-728](#) Test belongs to one of the HP MASTER ASE certified test, if needs to obtain the HP MASTER ASE certificate, you also need to participate in other related test, the details you may visit the [HP MASTER ASE](#) certified topic, in there, you will see all related HP MASTER ASE certified subject of examination.

HP0-728

Just4Exam professional provide HP MASTER ASE HP0-728 the newest Q&A, completely covers HP0-728 test original topic. With our complete HP MASTER ASE resources, you will minimize your HP MASTER ASE cost and be ready to pass your HP0-728 tests on Your First Try, 100% Money Back Guarantee included!

Just4Exam Engine Features

Comprehensive questions and answers about HP0-728 exam

HP0-728 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

HP0-728 exam questions updated on regular basis

Same type as the certification exams, HP0-728 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free HP0-728 exam demo before you decide to buy it in Just4Exam.com

Just4Exam Help You Pass Any IT Exam

[Just4Exam.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HP HP0-728

Title : Replication Solutions for the HP StorageWorks EVA

1. What occurs during normalization of a DR group?

- A. The destination Vdisk is updated with data from the log file.
- B. The data and group sequence number is written to the log disk.
- C. The initial copy from the source Vdisk to the destination Vdisk is in progress.
- D. Only the current host I/O to the source Vdisk is copied to the destination Vdisk.

Answer: C

2. A customer plans for an extended power outage at their source site. All DR groups are set to failsafe mode enabled. The customer needs application usage at the remote site.

What needs to be done? (Choose two.)

- A. perform a DR group failover
- B. disable failsafe mode
- C. perform a resume operation
- D. Nothing is required, as storage is accessible.

Answer: AB

3. Which two are valid Continuous Access EVA commands? (Choose two.)

- A. failover
- B. failback
- C. failsafe mode enable
- D. failsafe-locked enable

Answer: AC

4. Which array receives the Continuous Access failover command?

- A. the source array only
- B. the destination array only
- C. both the source and destination arrays
- D. neither the destination, nor the source arrays

Answer: B

5. Which two statements about Business Copy (BC) are true? (Choose two.)

- A. BC is limited to 16 EVA storage systems.
- B. BC supports an unlimited number of storage systems.
- C. BC supports up to 25 servers running the BC host agent.
- D. BC supports an unlimited number of servers running the BC host agent.

Answer: AD

6. Where is the Business Copy (BC) server component installed in the diagram?

- A. storage array
- B. host (Node 2)
- C. desktop with web browser
- D. Storage Management Appliance (Node 1)

Answer: D

7. Which Continuous Access term describes this graphic?

- A. failsafe lock
- B. managed set
- C. failback process
- D. synchronous mode
- E. asynchronous mode

Answer: E

8. A customer has an Oracle database. The Oracle redo log disk and data disk are part of the same DR group, which has failsafe mode enabled. The Oracle redo log disk on the destination fails.

What happens?

- A. All future host I/Os are written to the log.
- B. The Vdisk in the DR group no longer accepts host I/O.
- C. The destination is automatically marked for a full copy.
- D. Failsafe mode is disabled and I/O operations are resumed.

Answer: B

9. You are creating a DR group for a database.

Which disk group is used for the write history log for the database DR group?

- A. an empty disk group with 2 TB of space
- B. a new disk group will get created for the log disk
- C. 3 TB database disk group with 1 TB of free space
- D. 5 TB windows disk group with 2 TB of occupied space

Answer: D

10. To be a Business Copy (BC) server, the Storage Management Appliance MUST have which three installed?

(Choose three.)

- A. BC server software
- B. Command View EVA
- C. SAN connection to a host
- D. SAN connection to a HSV storage subsystem

Answer: ABD

11. One of two intersite links fails on a Continuous Access EVA high availability configuration. Which two statements are true? (Choose two.)

- A. I/O operations transfer from one fabric to the other.
- B. If failsafe is enabled, then host I/O operations will stop.
- C. Replication Solutions Manager will report a broken connection.
- D. All DR groups on the affected path will fail over to other controllers.

Answer: AC

12. A customer has a high availability Continuous Access EVA environment. All DR groups are set to failsafe mode enabled. The source site array has a hardware failure and all DR groups are failed over to the destination site. The hardware failure is then fixed.

Which two commands need to be set to restore normal operations at the source site? (Choose two.)

- A. failover
- B. failback
- C. resume
- D. suspend
- E. failsafe mode enable

Answer: AE

13. Why does HP recommend synchronous replication mode over asynchronous replication mode?

- A. Synchronous replication mode saturates at a lower rate.
- B. Synchronous replication mode provides better data protection.
- C. Write order is not assured using asynchronous replication mode.
- D. Synchronous replication mode responds faster when the I/O rate is below saturation.

Answer: B

14. Which events can you see in the Replication Solutions Manager?

- A. only events that are related to DR groups
- B. only the Continuous Access specific events
- C. only events that are related to managed sets
- D. all EVA events for the subsystems that are part of the Continuous Access environment

Answer: D

15. For the Continuous Access EVA, which two statements are true for DR group normal mode? (Choose two.)

- A. It assures best performance.
- B. It ensures the highest data integrity.
- C. It is the default mode for a DR group.
- D. It stops I/O if the destination is unavailable.
- E. It is also referred to as failsafe-disabled mode.

Answer: CE

16. A site loses intersite links for an extended period of time. When the links come back, all DR groups are merging. This causes a significant host performance issue.

What are two recommended procedures used to enhance host I/O performance? (Choose two.)

- A. detach some copy sets
- B. issue a suspend command against some of the less critical copy sets

- C. issue a suspend command against some of the less critical DR Groups
- D. issue a suspend command against some of the less critical managed sets

Answer: CD

17. What occurs during the merging state of a DR group?

- A. Initial copy from source to destination is in progress.
- B. Source Vdisk is fully copied to the destination Vdisk.
- C. Data and group sequence number is written to the log disk.
- D. Writes are written in sequence to the destination Vdisk from the log.

Answer: D

18. Replication Solutions Manager receives Continuous Access event information directly from _____.

- A. HSV controllers
- B. Command View EVA
- C. Systems Insight Manager
- D. Storage Management Server Notification Utility

Answer: A

19. The destination controller pair fails. All DR groups are set to failsafe mode enabled. The customer needs application usage immediately.

What needs to be done?

- A. perform a DR failover
- B. disable failsafe mode
- C. perform a resume operation
- D. Nothing is required, as storage is accessible.

Answer: B

20. Which three would result in a Replication Solutions Manager event? (Choose three.)

- A. Vdisk failure
- B. job completion
- C. disk group created
- D. transitioned to logging state

Answer: ABD
