

HP0-850 Certification I

HP Integrating Oracle9i with hp Platforms

HP0-850: Integrating Oracle9i with hp Platforms

Practice Exam: HP0-850 Exams

Exam Number/Code: HP0-850

Exam Name: Integrating Oracle9i with hp Platforms

Questions and Answers: 238 Q&As

([Certification I](#))

Certification I [HP0-850](#) Braindumps Q&A are created by senior IT lecturers in Just4Exam certification Q&A network and Certification I product experts combination PROMETRIC or VUE true-to-date environmental examination of the original title. Exam : [HP0-850](#)

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **HP Certification I HP0-850** examination of original title complete coverage.Just4Exam **HP0-850 Braindumps** Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: HP0-850

Exam Name: Integrating Oracle9i with hp Platforms(Certification I)

Questions and Answers: 238 Q&A

Just4Exam provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the HP0-850 Exam.

HP0-850 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Certification I product experts, included the current newest HP0-850 examination questions.

3. 100% Guarantee to Pass Your Certification I exam and get your Certification I Certification.

All will purchase "HP0-850 Q&A" customers will obtain refund money after-sale commitments if do not pass the exam, And enjoy the upgrade Q&A service for free in one year. Ensure customers a pass rate.Just4Exam helps you one time pass the Certification I HP0-850 tests.

We promised that use Just4Exam Q&A ensure you pass the exam at your first try.

1. The Q&A are from cooperation exam center of the real original title,summaried by our professional team and collated by senior IT lectured in co-training center to make sure the professional quality of the Q&A.The correctly of the Q&A is 100%, the coverage of HP0-850 Q&A are more than 96%.All you need to study the whole HP0-850 Q&A before you participate the certification exam,it should be possible to easily complete the exam and pass the certification.

2. Just4Exam to all the Q&A, we promised "do not pass the exam give you a full refund". If you buy our HP0-850 Q&A and did not pass the exam at the first try. You can take the examination report card that stamped with PROMETRIC or VUE test centers Seal. we will refund your full cost of HP0-850 Q&A, absolutely guarantee you interests have no losses.(For a full refund details)

3. Just4Exam professional IT Q&A vendors, we provide well after-sale service. To all the customers buy the Q&A, we provide track service. when you buy the Q&A with in one year. you can enjoy the upgrade Q&A service for free. If in this period, the certified test center change the HP0-850 Q&A, we will update the Q&A in the first time, and provide you the download update for free.

HP HP0-850 Test belongs to one of the Certification I certified test, if needs to obtain the Certification I certificate, you also need to participate in other related test, the details you may visit the [Certification I](#) certified topic, in there, you will see all related Certification I certified subject of examination.

HP0-850

Just4Exam professional provide Certification I HP0-850 the newest Q&A, completely covers HP0-850 test original topic. With our complete Certification I resources, you will minimize your Certification I cost and be ready to pass your HP0-850 tests on Your First Try, 100% Money Back Guarantee included!

Just4Exam Engine Features

Comprehensive questions and answers about HP0-850 exam

HP0-850 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

HP0-850 exam questions updated on regular basis

Same type as the certification exams, HP0-850 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free HP0-850 exam demo before you decide to buy it in Just4Exam.com

Just4Exam Help You Pass Any IT Exam

Just4Exam.com offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : HP HP0-850

Title : Integrating Oracle9i with hp Platforms

1. What is the recommended strategy for tuning the Process Global Area (PGA) working memory? Configure the PGA

_____.

- A. to complete 100% of the operations in a single pass
- B. to complete 100% of the operations in two passes
- C. to complete 90% of the operations in a single pass and 10% of the operations in two passes
- D. for a 90% cache hit rate

Answer: C

2. To avoid a livelock, you should design your transactions to:

- A. obtain an exclusive lock and monitor its idle time. If the idle time is too long, release the exclusive lock and try a shared lock first.
- B. obtain an update lock before attempting to obtain an exclusive lock, which enables the RDBMS to block new shared locks until your transaction can obtain the exclusive lock it wants and completes execution.
- C. wait until all shared locks on the data set are released before attempting to obtain an exclusive lock.
- D. acquire an update lock and monitor its idle time. If the idle time is too long, release the update lock and try a shared lock first.

Answer: B

3. What software is required to run the ProLiant Transaction Processing Sizer for Oracle9i offline?

- A. HP Insight Manager
- B. Survey Utility
- C. Microsoft Internet Information Server
- D. MSDE or Microsoft SQL Server

Answer: C

4. Which Oracle StatsPack collection level retrieves high-resource SQL statistics?

- A. level 0
- B. level 1
- C. level 5
- D. level 6

Answer: C

5. What must be true for Oracle9i to collect wait event statistics? The _____.

- A. BSTAT/ESTAT tools must be installed
- B. Oracle StatsPack must be installed
- C. timed_statistics option must be set to 1
- D. V\$system_event table must be manually created

Answer: C

6. Which attribute is not a characteristic of data warehouse systems?

- A. little or no growth after data is loaded
- B. consolidation of data from various information systems
- C. small number of users executing highly complex transactions
- D. heavy utilization of temporary workspace

Answer: A

7. What measures disk subsystem performance in bandwidth-intensive environments?

- A. GB/hr
- B. MB/s
- C. random I/O requests per second
- D. transactions per second

Answer: B

8. A transaction becomes committed and its changes are permanent when _____.

- A. Oracle completes the next scheduled checkpoint.
- B. the transaction issues the CHECKPOINT statement and Oracle finishes the checkpoint.
- C. the transaction issues the COMMIT statement and Oracle completes the corresponding write to the redo log.
- D. the transaction issues the COMMIT statement.

Answer: C

9. If you have a high volume of random disk I/O requests, what provides the highest disk subsystem performance?

- A. fast transfer protocol
- B. large number of disk drives and proper data distribution
- C. large number of high-bandwidth disk controllers
- D. low number of fast-spinning disk drives

Answer: B

10. Which components define an Oracle instance?

- A. Oracle instance processes
- B. Database and its data files
- C. System Global Area (SGA)

D. Oracle instance processes and SGA

Answer: D

11. What sustained processor queue length indicates processor congestion?

A. 2

B. 4

C. two times the number of processors

D. four times the number of processors

Answer: A

12. Where does the ProLiant Performance Analyzer store collected information for future playback?

A. In a local encrypted binary file.

B. In an MSDE or Microsoft SQL Server database.

C. In an online ActiveAnswers repository.

D. In an Oracle database.

Answer: B

13. Your disk subsystem volume contains ten 9.1GB, 10K-rpm disk drives with a random I/O requests-per-second rate of 90. You have deployed RAID 0 over these drives. You measure a combined logical transfer rate of 1500 I/O requests-per-second and determine that the disk queue length for this volume is 67. What should you do to increase the system performance?

A. Both the random I/O requests-per-second rate per disk drive and the disk queue length indicate a disk bottleneck. Add more disk controllers.

B. Both the random I/O requests-per-second rate per disk drive and the disk queue length indicate that the disk subsystem is not a performance bottleneck. An investigation into other system areas is necessary.

C. The random I/O requests-per-second rate per disk drive indicates a disk bottleneck, which is also confirmed by the longer-than-recommended disk queue length. Adding more disk drives is necessary to increase the performance.

D. The random I/O requests-per-second rate per disk drive indicates a disk bottleneck, which is also confirmed by the longer-than-recommended disk queue length. Before adding more disk drives, an analysis of the memory utilization is necessary.

Answer: D

14. Which network setting enables the application to maximize the usage of the operating system file cache?

A. maximize data throughput for file sharing

B. maximize data throughput for network applications

C. minimize memory used

D. balance

Answer: A

15. You create an index on the social security numbers column of your employee information table. What will the RDBMS use to determine if your company employs a person with a certain social security number?

A. direct index access

B. existence check

C. sequential index access

D. The RDBMS does not use an index.

Answer: B

16. What action is indicated to the RDBMS when a transaction issues the ROLLBACK statement as the last SQL statement?

A. Free up an occupied database buffer.

B. Initiate the failover procedure.

C. Abort the transaction and undo its effects on the database.

D. Revert to a stored procedure.

Answer: C

17. Click the Exhibit button.

You query the DB_CACHE_ADVICE view and retrieve the results listed in the table displayed in the Exhibit. If you decrease the current database buffer cache by 92MB, what would be the increase in database buffer cache misses?

- A. 13%
- B. 33%
- C. 74%
- D. 100%

Answer: C

18. What is the recommended method for speeding up decision-support queries that are executed serially?

- A. add more processors
- B. configure more dispatchers
- C. increase the size of the System Global Area (SGA)
- D. use concurrency-inducing technology, such as the Oracle Parallel Query

Answer: D

19. Which Oracle view should you query to determine the library cache hit rate?

- A. V\$LIBRARYCACHE
- B. V\$ROWCACHE
- C. V\$SESSTAT
- D. V\$SGASTAT

Answer: A

20. Which statement is false?

- A. The lack of memory can exhibit itself as a disk bottleneck.
- B. If the sum of operating system memory, Oracle9i memory, and non-Oracle application memory exceeds physical RAM; memory paging will occur.
- C. You should tune memory after you tune the disk subsystem.
- D. You should tune the application and SQL before making a final determination of the physical memory in your system.

Answer: C
