LOT-803: Using LotusScript in IBM Lotus Domino 8 Applications

Practice Exam: LOT-803 Exams

Exam Number/Code: LOT-803

Exam Name: Using LotusScript in IBM Lotus Domino 8 Applications

Questions and Answers: 151 Q&As

([Lotus Certification](#))

Exam : [LOT-803](#)

Lotus Certification [LOT-803](#) Braindumps Q&A are created by senior IT lecturers in Just4Exam certification Q&A network and Lotus Certification product experts combination PROMETRIC or VUE true-to-date environmental examination of the original title.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **IBM Lotus Certification LOT-803** examination of original title complete coverage. Just4Exam **LOT-803 Braindumps** Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: LOT-803

Exam Name: Using LotusScript in IBM Lotus Domino 8 Applications(Lotus Certification)

Questions and Answers: 151 Q&A

Just4Exam provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the LOT-803 Exam.

LOT-803 simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Lotus Certification product experts, included the current newest LOT-803 examination questions.

3. 100% Guarantee to Pass Your Lotus Certification exam and get your Lotus Certification Certification.

All will purchase "LOT-803 Q&A" customers will obtain refund money after-sale commitments if do not pass the exam, And enjoy the upgrade Q&A service for free in one year. Ensure customers a pass rate. Just4Exam helps you one time pass the Lotus Certification LOT-803 tests.

We promised that use Just4Exam Q&A ensure you pass the exam at your first try.

1. The Q&A are from cooperation exam center of the real original title, summarized by our professional team and collated by senior IT lectured in co-training center to make sure the professional quality of the Q&A. The correctly of the Q&A is 100%, the coverage of LOT-803 Q&A are more than 96%. All you need to study the whole LOT-803 Q&A before you participate the certification exam, it should be possible to easily complete the exam and pass the certification.

2. Just4Exam to all the Q&A, we promised "do not pass the exam give you a full refund". If you buy our LOT-803 Q&A and did not pass the exam at the first try. You can take the examination report card that stamped with PROMETRIC or VUE test centers Seal. we will refund your full cost of LOT-803 Q&A, absolutely guarantee you interests have no losses. (For a full refund details)

3. Just4Exam professional IT Q&A vendors, we provide well after-sale service. To all the customers buy the Q&A, we provide track service. when you buy the Q&A with in one year. you can enjoy the upgrade Q&A service for free. If in this period, the certified test center change the LOT-803 Q&A, we will update the Q&A in the first time, and provide you the download update for free.

IBM LOT-803 Test belongs to one of the Lotus Certification certified test, if needs to obtain the Lotus Certification certificate, you also need to participate in other related test, the details you may visit the [Lotus Certification](#) certified topic, in there, you will see all related Lotus Certification certified subject of examination.

LOT-803

Just4Exam professional provide Lotus Certification LOT-803 the newest Q&A, completely covers LOT-803 test original topic. With our complete Lotus Certification resources, you will minimize your Lotus Certification cost and be ready to pass your LOT-803 tests on Your First Try, 100% Money Back Guarantee included!

Just4Exam Engine Features

Comprehensive questions and answers about LOT-803 exam

LOT-803 exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

LOT-803 exam questions updated on regular basis

Same type as the certification exams, LOT-803 exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free LOT-803 exam demo before you decide to buy it in Just4Exam.com

Just4Exam Help You Pass Any IT Exam

Just4Exam.com offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM LOT-803

Title : Using LotusScript in IBM Lotus Domino 8 Applications

1. Ichiro needs to write an agent to read a comma-delimited ASCII file of data about parts that his company uses when building computers. The data is from one of the parts suppliers, and includes 10 fields in each record. Ichiro needs to extract the Part Number, Part Description, and Price from each input record and update his company's Inventory database with the current data. How should Ichiro proceed?

A. Create a user-defined data Type to represent a Part. Write a 'getter' method for each of the 3 fields that need to be accessed from the data Type.

B. Create a user-defined class to represent the ASCII file. Write a 'getter' method to retrieve each record, and use the NotesStream.SplitText method to extract the fields.

C. Create a user-defined class to represent the Parts data. Use notesDOMTextNode.SplitText(", ") to parse each field into the appropriate member variable.

D. Create a user-defined data Type to represent the structure of the Parts data. Each field of a given input record can be referenced using the appropriate member variable.

Answer: D

2. Given the following piece of code, where "doc" is a NotesDocument:

```
fieldValue = doc.GetItemValue("Title")
```

```
Print "This document's title is" _fieldValue(0)
```

Which of the following is a correct example of using the "Extended class" syntax to replace the example code above?

- A. Print "This document's title is" _doc.Title
- B. Print "This document's title is" _doc.Title(0)
- C. Print "This document's title is" _doc.GetField.Title
- D. Print "This document's title is" _doc.GetField.Title(0)

Answer: B

3. Avery has been asked to write a web service in his Domino application. The web service will allow an Oracle application to query the Movie Rental database with a member identification number and receive a list of all movies the member has rented in the last 30 days. What are the language options available to Avery for writing this web service?

- A. LotusScript and Java
- B. LotusScript, but not Java
- C. Jave, but not LotusScript
- D. LotusScript, Java, and @Formula

Answer: A

4. Aitana is working in the company's Inventory database. She wants to create an array called 'Assembly' that will be used to reference 10 instances of the Part class. Aitana can create a single instance of the Part class using code like this:

```
Dim myPart As New Part
```

But she is having a problem creating the 'Assembly' array. What is wrong with the following line of code:

```
Dim Assembly(9) As New Part
```

- A. The New keyword cannot be used to declare an array of object reference variables.
- B. 'Assembly' is a reserved word in LotusScript, and cannot be used as a variable name.
- C. If an array declared as Assembly(9) is to hold 10 elements, Option Base 0 must be used.
- D. An array cannot be used to hold multiple Class instances.

Answer: A

5. For agents that run on new and modified documents, newly received mail documents, or newly modified documents, what method can you use to make each document as "processed" to ensure that a document gets processed by the agent only once (unless it's modified, mailed, or pasted again)?

- A. NotesView.UpdateAll
- B. NotesDocument.SetProcessed
- C. NotesDocumentCollection.Stamp
- D. NotesSession.UpdateProcessedDoc

Answer: D

6. Neala is using a hidden field on the Request form to store a temporary value for the request status. Since this field will not be stored, Neala has created it as a Computed for display field. Neala is trying to use the code below to set the tempStatus field to "Draft" when a new document is created with the Request form. An error message displays whenever a new Request is created. What could be the problem?

```
Sub Postopen(Source As Notesuidocument)
If Source.IsNewDoc Then
Call Source.FieldSetText( "tempStatus", "Draft" )
End If
End Sub
```

- A. In order for the FieldSetText method to be used, a field must be editable. Hidden fields are not editable.
- B. The Postopen event occurs before the user has input focus, so only back-end methods will work from this event.
- C. In order for the FieldSetText method to be used, a field must be editable. Computed for display fields are not editable.
- D. The Postopen event occurs after the document has opened, but Computed for display fields are not available for manipulation until after the has input focus.

Answer: C

7. The error message "Error loading USE or USELSX module" can be caused by which of the following?

- A. An improperly defined Const value
- B. An ODBC connection that cannot be made
- C. An attempt to use NotesUIWorkspace in a background scheduled agent
- D. A script library that can't be found or needs to be recompiled using "Recompile All LotusScript"

Answer: D

8. The Salary form needs an AuditHistory field. When documents are changed, Sahir's script must record the date/time, editor's name, and values of all changed fields before and after the change. The solution must also be usable in other forms, and must work without modification, event if new fields are added to the forms. How can Sahir do this?

- A. Write Entering event code for each field, recording field values. Write Exiting events to update AudiHistory if the values change.
- B. Write Postopen event code to populate a list with item names and item values as the document is opened. Write Querysave event code to examine current item values, and update AudiHistory for any changed items.
- C. Write onFocus event code to populate a hidden temporary field with the item values. Write onChange event code to update the AuditHistory if the field is changed.
- D. Write onload event code to populate a list with item names and item values as the document is opened. In the form onExit event, write code to examine current item values and update AudiHistory for any items that changed.

Answer: B

9. The NotesStream class is used to read and write which of the following?

- A. Files
- B. Network sockets
- C. Domino server console commands
- D. Binary data in NotesRich Text fields (like attachments and inline images)

Answer: A

10. Marvin wants to export a given Notes document to a DXL text file. How would he accomplish this task?

- A. He would use the NotesXMLTransformer class to copy the document directly to a text file
- B. He would use the ExportDXL method of the NotesDocument class to send the document to a NotesStream that writes to a text file
- C. He would create a NotesDXLExporter object, set the input to the Notes document in question, and set the output to a NotesDXLOutput object that writes to a text file
- D. He would create a NotesDXLExporter object, set the input to the Notes document in question, and set the output to a string that indicates the path of the text file he wants to create.

Answer: D
