Exam : IBM LOT-849

Title : IBM Lotus Notes Domino 8 Managing Servers and Users

1. When installing the Notes client, what documents are created by default that contain communication, Java applet security and port information?

- A. Account
- B. Location
- C. Connection
- D. Certificate

Answer: B

2. Which of the following mail features is not available in the basic version of the Lotus Notes client?

- A. Message recall
- B. Attention indicators
- C. Choice of preview pane location
- D. Reply to all without attachments

Answer: C

3. You want to restrict simple search to enhance server performance by preventing users from searching databases on a server that do not have full-text search enabled. In which of the following locations is this configured?

- A. The server document
- B. The server notes.ini
- C. The server configuration document
- D. The advanced properties of each database

Answer: D

4. Liz wishes to disable transaction logging for a particular database on a server with transaction logging enabled. However, she cannot see the Advanced Database Properties to do so. What is the cause of this?

- A. She is not in the Administrators field on the server document.
- B. She cannot selectively turn off transaction logging for individual databases.
- C. She must add the notes.ini line to the server DisableTransLog=name of database.
- D. Transaction logging can only be disabled per document, not for an entire database.

Answer: A

5. The Smart Upgrade function can be configured to adjust an installation between just the Notes client or all clients automatically. Where is the parameter read to make this automatic adjustment?

- A. The Notes client notes.ini file
- B. The Domino server notes.ini file that holds the Smart Upgrade database
- C. The server document for the server that holds the Smart Upgrade database
- D. The server configuration document for the server that holds the Smart Upgrade database

Answer: A

6. In which of the following databases does the Server Health Monitor store its health reports?

- A. shmon.nsf
- B. dommon.nsf
- C. statrep.nsf
- D. serverhm.nsf

Answer: B

7. Jordan, the Domino administrator, has configured replication probes in DDM but nothing is being reported into the DDM database. What could be the possible cause of this?

- A. Replication is up to date and was attempted, but was considered Null.
- B. Replication was attempted but the destination server could not be reached for the probe check.
- C. Replication was performed and numerous changes were made to the source database and none to the spokes.
- D. Replication was attempted but the source server did not have proper access to replicate so replication was skipped.

Answer: A

8. Which of the following is not available for modification with the install manifest?

- A. Sametime
- B. Activities
- C. IBM Productivity Tools
- D. Composite application editor

Answer: A

9. You are enabling a policy for the Productivity Tools. Which of the following is NOT available to configure in this policy?

- A. The ability to open SmartSuite files
- B. The ability to allow the user to run macros
- C. The ability to allow the use of Productivity Tools
- D. The ability to restrict attaching Productivity Tool documents

Answer: D

10. Smart Upgrade failover utilizes what search order?

- A. By document link in the Notes client
- B. By server name and hard-coded path to the Smart Upgrade database
- C. By database replica ID and database name in the home server cluster
- D. By notes.ini variable on the client listing all servers in the domain the Smart Upgrade database may be found on

Answer: C
