

SF-040X Veritas Certification

Veritas VERITAS Storage Foundation 4.0 Specialist

SF-040X: VERITAS Storage Foundation 4.0 Specialist

Practice Exam: SF-040X Exams

Exam Number/Code: SF-040X

Exam Name: VERITAS Storage Foundation 4.0 Specialist

Questions and Answers: 128 Q&As

([Veritas Certification](#))

Exam : [SF-040X](#)

Veritas Certification [SF-040X](#) Braindumps Q&A are created by senior IT lecturers in Just4Exam certification Q&A network and Veritas Certification product experts combination PROMETRIC or VUE true-to-date environmental examination of the original title.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Veritas Veritas Certification SF-040X** examination of original title complete coverage. Just4Exam **SF-040X Braindumps** Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: SF-040X

Exam Name: VERITAS Storage Foundation 4.0 Specialist(Veritas Certification)

Questions and Answers: 128 Q&A

Just4Exam provide the professional Q&A.

1. We offer free update service for three month.

After you purchase our product, we will offer free update in time for three month.

2. High quality and Value for the SF-040X Exam.

SF-040X simulation test questions, including the examination question and the answer, complete by our senior IT lecturers and the Veritas Certification product experts, included the current newest SF-040X examination questions.

3. 100% Guarantee to Pass Your Veritas Certification exam and get your Veritas Certification Certification.

All will purchase "SF-040X Q&A" customers will obtain refund money after-sale commitments if do not pass the exam, And enjoy the upgrade Q&A service for free in one year. Ensure customers a pass rate. Just4Exam helps you one time pass the Veritas Certification SF-040X tests.

We promised that use Just4Exam Q&A ensure you pass the exam at your first try.

1. The Q&A are from cooperation exam center of the real original title, summarized by our professional team and collated by senior IT lectured in co-training center to make sure the professional quality of the Q&A. The correctly of the Q&A is 100%, the coverage of SF-040X Q&A are more than 96%. All you need to study the whole SF-040X Q&A before you participate the certification exam, it should be possible to easily complete the exam and pass the certification.

2. Just4Exam to all the Q&A, we promised "do not pass the exam give you a full refund". If you buy our SF-040X Q&A and did not pass the exam at the first try. You can take the examination report card that stamped with PROMETRIC or VUE test centers Seal. we will refund your full cost of SF-040X Q&A, absolutely guarantee you interests have no losses. (For a full refund details)

3. Just4Exam professional IT Q&A vendors, we provide well after-sale service. To all the customers buy the Q&A, we provide track service. when you buy the Q&A with in one year. you can enjoy the upgrade Q&A service for free. If in this period, the certified test center change the SF-040X Q&A, we will update the Q&A in the first time, and provide you the download update for free.

[Veritas SF-040X](#) Test belongs to one of the Veritas Certification certified test, if needs to obtain the Veritas Certification certificate, you also need to participate in other related test, the details you may visit the [Veritas Certification](#) certified topic, in there, you will see all related Veritas Certification certified subject of examination.

SF-040X

Just4Exam professional provide Veritas Certification SF-040X the newest Q&A, completely covers SF-040X test original topic. With our complete Veritas Certification resources, you will minimize your Veritas Certification cost and be ready to pass your SF-040X tests on Your First Try, 100% Money Back Guarantee included!

Just4Exam Engine Features

Comprehensive questions and answers about SF-040X exam

SF-040X exam questions accompanied by exhibits

Verified Answers Researched by Industry Experts and almost 100% correct

SF-040X exam questions updated on regular basis

Same type as the certification exams, SF-040X exam preparation is in multiple-choice questions (MCQs).

Tested by multiple times before publishing

Try free SF-040X exam demo before you decide to buy it in Just4Exam.com

Just4Exam Help You Pass Any IT Exam

[Just4Exam.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : VERITAS SF-040X

Title : VERITAS Storage Foundation 4.0 Specialist

1. Which two commands can be used to remove a mirror from a volume? (Choose two.)

- A. vxassist remove mirror
- B. vxdisk
- C. vxremove mirror
- D. vxplex

Answer: AD

2. You are running Volume Manager 4.0. You have a disk group named datadg that has a disk group version of 50. What occurs when you run the vxdg upgrade datadg command with no other options?

- A. The disk group is upgraded by one disk group version level, in this case, to version 60.
- B. You receive an error stating that the disk group version must be specified.
- C. The disk group is upgraded to the highest disk group version supported by the Volume Manager release.
- D. The disk group is NOT upgraded. The version remains at 50.

Answer: C

3. In this volume layout the mirroring occurs below the striping or concatenation in order to mirror each column of the stripe or each chunk of the concatenation. This type of layout is called a layered volume.

What is the correct RAID level for a volume layout that combines mirroring with striping or concatenation?

- A. RAID-1+0
- B. RAID-0+1
- C. RAID-5
- D. RAID-2

Answer: A

4. Which two virtual objects are components of a Volume Manager volume? (Choose two.)

- A. VM disk
- B. subdisk
- C. plex
- D. physical disk

Answer: BC

5. What is the virtual object that Volume Manager uses to represent the structured or ordered collection of subdisks?

- A. volume
- B. plex
- C. vmdisk
- D. disk group

Answer: B

6. Which statement is true about adding a mirror to an existing striped volume?

- A. A concatenated plex is added to the volume by default.
- B. You can use any disks in the disk group to contain the new plex.
- C. Synchronization of the new plex is required.
- D. You should add the new plex to a different disk group for redundancy.

Answer: C

7. When using Volume Manager, what is considered the correct definition for RAID-5?

- A. Combines mirroring with striping or concatenation where the mirroring occurs below the striping or concatenation in order to mirror each column of the stripe or each chunk of the concatenation
- B. Refers to mirroring where data from one disk is duplicated on another disk to provide redundancy and enable fast recovery.
- C. Refers to simple concatenation or striping where disk space is combined sequentially from two or more disks or striped across two or more disks. RAID-0 does NOT provide data redundancy.
- D. Refers to a striped layout that includes the calculation of parity information and the striping of that parity information across the disks.

Answer: D

8. Which three plex types are valid in Volume Manager? (Choose three.)

- A. complete
- B. partial
- C. log
- D. sparse
- E. partition

Answer: ACD

9. Which command is used to move the contents of the volumes from one disk to another?

- A. vxremove
- B. vxevac
- C. vxdg move
- D. vxdg evac

Answer: B

10. What are three advantages of a properly configured traditional mirrored volume layout? (Choose three.)

- A. improved reliability and availability
- B. decreases the need for Volume Manager disks
- C. improved read performance
- D. fast recovery through logging

Answer: ACD

11. Which command displays the contents of the volboot file?

- A. volboot -list
- B. vxcat volboot
- C. vxdctl list
- D. vxconfig volboot

Answer: C

12. Which command both grows the payvol volume by an additional 30 MB and resizes the file system at the same time?

- A. vxassist -g hrdg growby payvol 30m
- B. vxresize -g hrdg payvol 30m
- C. vxresize -g hrdg payvol +30m
- D. vxassist -g hrdg growto payvol 30m

Answer: C

13. Which option is used with the vxassist command to change the layout of a layered volume to a nonlayered volume?

- A. mirror
- B. relayout
- C. convert
- D. layered

Answer: C

14. The Volume View window in VEA displays the characteristics of the volumes on the disks.

After selecting a volume or disk group in VEA, how is the Volume View window displayed?

- A. Tools Volume View
- B. Tools Volume ?View
- C. Actions Volume ?View
- D. Actions Volume View

Answer: D

15. Which three are characteristics of a disk group? (Choose three.)

- A. collection of Volume Manager disks
- B. eases the use of resources in a high availability environment
- C. allows Volume Manager objects to span multiple disk groups
- D. represents a management and configuration boundary

Answer: ABD

16. You are analyzing the output of the vxdisk list command. There are no entries in the DISK and GROUP columns; however, you see "online invalid" in the output of the STATUS column.

The "online invalid" status in this scenario indicates that the disk ____.

- A. is failing and needs to be replaced for future use in Volume Manager
- B. is NOT compatible with the current release of Volume Manager
- C. has neither been initialized nor encapsulated by Volume Manager (The disk is NOT under Volume Manager control.)
- D. is available for use and has encapsulated data deported on another system

Answer: C

17. Which area of a disk is used by Volume Manager to store information such as disk headers, configuration copies, and kernel logs?

- A. the public region
- B. the private region
- C. the virtual region
- D. the CDS region

Answer: B

18. Which Volume Manager script can be run before an upgrade of Volume Manager to check for potential problems?

- A. vx_upgrade -check
- B. vxvm_upgrade -check
- C. upgrade_start -check
- D. upgrade_finish -check

Answer: C

19. You are analyzing the output of the vxdisk alldgs list command. There are no entries in the DISK and GROUP columns; however, you see "online" in the output of the STATUS column.

Which three explain the "online" status of the disk in this scenario? (Choose three.)

- A. The disk is in the free disk pool.
- B. The disk has been initialized or encapsulated.
- C. The disk is NOT currently assigned to a disk group.
- D. The disk is currently deported on another system.

Answer: ABC

20. In order to resize an existing volume and its file system in Volume Manager while it remains online, the file system must be _____.

- A. in the bootdg disk group
- B. checked before the process
- C. shared across disk groups
- D. mounted during the process

Answer: D
